

Community Plan of Rhode Island

Quick reference guide

Opioid prevention and opioid use disorder treatment programs for UnitedHealthcare Community Plan of Rhode Island

In response to the U.S. opioid epidemic, we've developed programs to help our members receive the care and treatment they need in safe and effective ways. We've based our measures on the Centers for Disease Control and Prevention's (CDC) opioid treatment guidelines to help prevent overuse of short-acting and long-acting opioid medications. Please use this quick reference guide for information on what we offer.

Concurrent Drug Utilization Review (cDUR) programs

The cDUR program uses the pharmacy claims processing system to screen all prescriptions at the point of service and checks for possible inappropriate drug prescribing and utilization, as well as potentially dangerous medical implications or drug interactions. The program includes communication to the dispensing pharmacy at point of service through claims edits and messaging to the dispensing pharmacy at point of service. The pharmacist will need to address the clinical situation at the point of sale before entering appropriate NCPDP codes to receive an approved claim, unless otherwise stated below.

THERDOSE Acetaminophen	<ul style="list-style-type: none">• Combination opioids plus acetaminophen (APAP) limit• Prevents doses of APAP greater than 4 grams per day
Duplicate Therapy – Short-Acting Opioids (SAOs)	<ul style="list-style-type: none">• Alerts to concurrent use of multiple SAOs
Duplicate Therapy – Long-Acting Opioids (LAOs)	<ul style="list-style-type: none">• Alerts to concurrent use of multiple LAOs
Drug-Drug Interaction – Opioids and Medication-Assisted Treatment (MAT)	<ul style="list-style-type: none">• Point-of-sale alert for concurrent use of opioids and MAT drugs
Drug-Drug Interaction – Opioids and Benzodiazepines	<ul style="list-style-type: none">• Point-of-sale alert for concurrent use of opioids and benzodiazepines
Drug-Drug Interaction – Opioids and Carisoprodol	<ul style="list-style-type: none">• Point-of-sale alert for concurrent use of opioids and carisoprodol
Drug-Drug Interaction – Opioids and Antipsychotics	<ul style="list-style-type: none">• Point-of-sale alert for concurrent use of opioids and antipsychotics
Drug-Drug Interaction – Opioids and Sedative Hypnotics	<ul style="list-style-type: none">• Point-of-sale alert for concurrent use of opioids and sedative hypnotics
Drug-Inferred Health State – Opioids and Prenatal Vitamins and Medications Used in Pregnancy	<ul style="list-style-type: none">• Enhanced point-of-sale alert for concurrent use of opioids and prenatal vitamins and for concurrent use of opioids and medications used in pregnancy (e.g., doxylamine/pyridoxine)

Concurrent Drug Utilization Review (cDUR) programs

- This custom message does not require the pharmacist to enter appropriate NCPDP codes to receive an approved claim

Retrospective Drug Utilization Review (rDUR) programs

The rDUR program analyzes claims on a daily basis and sends communications to prescribers.

Abused Medications DUR Program

- Daily identification of members who are getting multiple opioid prescriptions from multiple prescribers and/or filling at multiple pharmacies
- Also identifies members with chronic early refill attempts, overlapping LAOs, overlapping SAOs, high daily doses of opioids, a diagnosis of opioid overdose with an opioid fill, overlapping opioid and MAT medications, overlapping opioid and a benzodiazepine, overlapping opioid and an antipsychotic medication, overlapping opioid, muscle relaxant and benzodiazepine and overlapping opioid and opioid potentiator
- Patient-specific information sent to all prescribers with medication fill history for the last 4 months

Pharmacy Lock-In Program

- Pharmacy lock-in programs vary by state, however, all include filling of opioids by multiple prescribers at multiple pharmacies as an inclusion criterion for the program
- Members chosen for the program will be locked into 1 pharmacy for all of their medications for a period of 1 year. Lock-in periods vary by state.

Utilization Management (UM) programs

UM programs promote appropriate use, help reduce costs and ultimately, help improve the health status of members.

Cumulative 90 Morphine Milligram Equivalent (MME) Limit

- Point-of-sale dosage limit for all opioid products up to 90 MME
- Prevents cumulative opioid doses above the preset threshold from processing
- Prior authorization required for doses above the preset threshold

LAO Prior Authorization

Prior authorization requires:

- Attestation of appropriate use and monitoring
- Step through short-acting opioid (non-cancer pain) and step through preferred LAOs
- If appropriate, step through neuropathic pain alternatives (non-cancer pain)

New-to-Therapy SAO Edit

- Point-of-sale limits for members who are opioid naïve (no opioid claims in the last 60 days)
- Point-of-sale limits include maximum of 30 MME and/or 20 units per fill on select SAOs
- Prior authorization required to exceed these quantities for opioid-naïve members

Cough and Cold Products Containing Opioid Components

- Quantity per fill of 120 mL (units) is applied as well as a 30-day maximum quantity of 360 mL (units)
- Prior authorization is required for those under age 18

Transmucosal Fentanyl Product Prior Authorization

- Prior authorization requires documentation of pain due to cancer and patient is already receiving opioids

Utilization Management (UM) programs

UM programs promote appropriate use, help reduce costs and ultimately, help improve the health status of members.

Buprenorphine MAT Prior Authorization	<ul style="list-style-type: none">No prior authorization required for preferred products with appropriate diagnosis at point-of-sale
Overdose Prevention (naloxone)	<ul style="list-style-type: none">No prior authorization is required for preferred naloxone products (generic naloxone injection, Narcan® Nasal Spray)

Evidence-Based Prescribing programs

Focuses on outreach to prescribers identified as outliers

Fraud/Waste/Abuse Evaluation	<ul style="list-style-type: none">Retrospective controlled substance claims analysisIdentifies outlier opioid prescribers
