

# **Maximum Frequency Per Day Policy, Professional**

#### IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY

You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare reimbursement policies may use Current Procedural Terminology (CPT®\*), Centers for Medicare and Medicaid Services (CMS) or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.

This reimbursement policy applies to all health care services billed on CMS 1500 forms and, when specified, to those billed on UB04 forms. Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design and other factors are considered in developing reimbursement policy.

This information is intended to serve only as a general reference resource regarding UnitedHealthcare's reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare enrollees. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to: legislative mandates, the physician or other provider contracts, the enrollee's benefit coverage documents and/or other reimbursement, medical or drug policies. Finally, this policy may not be implemented exactly the same way on the different electronic claims processing systems used by UnitedHealthcare due to programming or other constraints; however, UnitedHealthcare strives to minimize these variations. UnitedHealthcare may modify this reimbursement policy at any time by publishing a new version of the policy on this Website. However, the information presented in this policy is accurate and current as of the date of publication.

## **Application**

**History** 

This policy applies to services reported using the 1500 Health Insurance Claim Form (a/k/a CMS-1500) or its electronic equivalent or its successor form. This policy applies to all products, all network and non-network physicians and other qualified health care professionals, including, but not limited to, non-network authorized and percent of charge contract physicians and other qualified health care professionals. This policy does not apply to: Network Durable Medical Equipment (DME) providers, home health services and home health agencies; anesthesia management; ambulance services; network physicians and other qualified health care professionals contracted at a case rate (in some markets known as a flat rate) unless the code description for the service or supply indicates it should be reported only once daily. Maximum Frequency Per Day (MFD) limits for codes with a Medically Unlikely Edits (MUE) Adjudication Indicator (MAI) of 2 apply to all except DME providers. For Healthcare Common Procedure Coding System (HCPCS) codes reported with rental modifiers (KH, KI, KJ, KR, or RR) or the Maintenance and Service modifier (MS) by a participating

network and non-network durable medical equipment (DME), orthotics or prosthetics vendor, please refer to UnitedHealthcare's Durable Medical Equipment, Orthotics and Prosthetics Multiple Frequency Policy.

### **Policy**

#### Overview

The purpose of this policy is to ensure that UnitedHealthcare reimburses physicians and other qualified health care professionals for the units billed without reimbursing for obvious billing submission and data entry errors or incorrect coding based on anatomic considerations, HCPCS/CPT code descriptors, CPT coding instructions, established UnitedHealthcare policies, nature of a service/procedure, nature of an analyte, nature of equipment, and unlikely clinical treatment. The term "units" refers to the number of times services with the same Current Procedural Terminology (CPT®) or HCPCS codes are provided per day by the same individual physician or other qualified health care professional. To do this, UnitedHealthcare has established MFD values, which are the highest number of units eligible for reimbursement of services on a single date of service. Reimbursement also may be subject to the application of other UnitedHealthcare Reimbursement policies. This policy applies whether a physician or other qualified health care professional submits one CPT or HCPCS code with multiple units on a single claim line or multiple claim lines with one or more unit(s) on each line. It is common coding practice for some CPT and HCPCS codes to be submitted with multiple units.

MFD values will be evaluated and/or updated quarterly to reflect new, changed, and deleted codes. Review of MFD values for existing CPT and HCPCS codes based on criteria within this policy will be completed quarterly.

For the purpose of this policy, the same individual physician or other qualified health care professional is the same individual rendering health care services reporting the same Federal Tax Identification number.

### **Reimbursement Guidelines**

#### **MFD Determination**

## Part I

The following criteria are first used to determine the MFD values for codes to which these criteria are applicable:

- The Centers for Medicare and Medicaid Services (CMS) Medically Unlikely Edit (MUE) value, where available, may be utilized to establish an MFD value, including unlisted codes.
- When the service is classified as bilateral (Indicators 1 or 3 on the CMS National Physician Fee Schedule [NPFS]) or the term 'bilateral' is included in the code descriptor and when no MUE value has been established for these codes, the MFD value is one (1). There are some codes that describe more than one anatomical site or vertebral level that can be treated bilaterally where the MFD value may be more than 1.
- The CPT or HCPCS code description/verbiage indicates the number of times the service can be performed, in which case the MFD value is set at that value.
- The service is anatomically or clinically limited (e.g., anatomical site, vertebral level, dosage, units of measure and coding guidelines) with regard to the number of times it may be performed, in which case the MFD value is established at that value.
- CMS Durable Medical Equipment Medicare Administrative Contractor (DME MAC) Local Coverage Determination (LCD) assigns an MFD value in which case the MFD value is set at that value.
- Where no other definitive value has been established based on the criteria above, drug HCPCS codes will have an MFD value of 999 which indicates they bypass the MFD policy.
- Where no other definitive value has been established based on the criteria above, new CPT codes released by the American Medical Association and new HCPCS codes released by CMS (which are not covered by any of the above criteria), will have an MFD value of 100.

#### Part II

When none of the criteria listed in Part I apply to a code, data analysis is conducted to establish MFD values according to common billing patterns.

- When a code has 50 or more claim occurrences in a data set (excluding HCPCS drug codes), the MFD values
  are determined through claim data analysis and are set at the 100th percentile (i.e., the highest number of units
  billed for that CPT or HCPCS code in the data set). If the 100th percentile exceeds the 98th percentile by a
  factor of four, the MFD value will be set at the 98th percentile.
- When a code (excluding HCPCS drug codes) has less than 50 claim occurrences in a data set, the MFD values will be set at the default of 100 until the next annual analysis.
- In any case where, in UnitedHealthcare's judgment, the 98<sup>th</sup> percentile does not account for the clinical circumstances of the services billed, the MFD for a code may be increased so as to capture only obvious billing submission and data entry errors.

The "MFD CPT Code Values" and the "MFD HCPCS Code Values" lists in the attachments section below contain the most current MFD values/codes.

#### Reimbursement

The MFD values apply whether a physician or other qualified health care professional submits one CPT or HCPCS code with multiple units on a single claim line or multiple claim lines with one or more unit(s) on each line. It is common coding practice for some CPT and HCPCS codes to be submitted with multiple units. However, when reporting the same CPT or HCPCS code on multiple and/or separate claim lines, the claim line may be classified as a duplicate service.

Services provided are reimbursable services up to and including the MFD value for an individual CPT or HCPCS code. In some instances, a modifier may be necessary for correct coding and corresponding reimbursement purposes. See Q & A #3, 4 and 5.

#### **Modifiers LT and RT Restrictions**

Bilateral payment via the use of modifiers LT or RT is inappropriate for procedures, services, and supplies where the concept of laterality does not apply. UnitedHealthcare will pay up to the maximum frequency per day value for codes with "bilateral" or "unilateral or bilateral" in description or for codes where the concept of laterality does not apply, whether submitted with or without modifiers LT and/or RT by the same individual physician or other qualified health care professional on the same date of service for the same member. Use of modifiers LT and/or RT on the codes identified in the "Codes Restricting Modifiers LT and RT" list in the attachments section below will be considered informational only.

There may be situations where a physician or other qualified health care professional reports units accurately and those units exceed the established MFD value. In such cases, UnitedHealthcare will consider additional reimbursement if reported with an appropriate modifier such as modifier 59, 76, 91, XE, XS, or XU. Medical records are not required to be submitted with the claim when modifiers 59, 76, 91, XE, XS, or XU are appropriately reported. Documentation within the medical record should reflect the number of units being reported and should support the use of the modifier.

## Medically Unlikely Edit (MUE) Adjudication Indicator (MAI) 2

CMS has identified CPT/HCPCS codes where the units of service (UOS) on the same date of service in excess of the MUE value would be considered impossible because it is contrary to statute, regulation, or sub-regulatory guidance. Therefore, UnitedHealthcare will not allow units in excess of the MFD value to be reimbursed for CPT/HCPCS codes assigned an MAI indicator of "2". Per CMS guidelines, no modifier override will be allowed, however, anatomic modifiers may be considered when appropriate.

The MFD MAI2 Indicator Codes list in the attachments section below contain the most current MAI2 Indicator Codes.

procedure on multiple digits such as fingers or toes?

fingers; TA or T1-9 may be used to report specific toes.

A: If the bilateral procedure is provided more than once per day, modifiers 59, 76, or XS may be appropriate to bill depending on the circumstance. Additional reimbursement will be considered with the use of these modifiers.

Q: Would the MFD value for hand or foot bilateral procedures remain at 1 unit if it is possible to perform the

A: The MFD value would remain at 1 unit, however, HCPCS modifiers FA or F1-9 may be used to report specific

				,				
	<b>Q:</b> Will UnitedHealthcare allow more than 1 unit for a CPT or HCPCS code with "per diem" or "per day" in the code description?							
6	A: UnitedHealthcare will allow 1 unit of a procedure code with "per diem" or "per day" or other verbiage describing							
	once daily in the code description.							
7	Q: What is an example of a code that is limited because of anatomical or clinical reasons?							
	A: An Appendectomy would be set at the MFD value of 1 unit because a person only has one appendix.							
		should 90460 and/or 90461 be reported when multi ed on the same date of service? For example, if the						
	administers immunizations for a 2-month-old infant on the same date of service according to the current							
	immuniz	zation schedule, how should the following immuniza	tions be reported?					
		Immunization	Components	CPT Code				
		DtaP intramuscular administration	3	90460				
				90461 x 2				
		Rotavirus oral administration	1	90460				
		Hepatitis B and Hemophilus influenza b intramuscular administration	2	90460				
8				90461				
		Poliovirus intramuscular administration	1	90460				
		Pneumococcal conjugate vaccine	1	90460				
	A: Coding practices may vary by physician or other qualified health care professional offices. It is appropriate to report the immunization administration of the first and additional vaccine/toxoid component with face-to-face							
	counseling on one line with multiple units and a link to all associated ICD-10-CM codes or report each component on a separate line. In the example above, the claim could be reported as 90460 with 5 units on one line and							
	90461 with 3 units on a separate line with the associated ICD-10-CM diagnoses linked to each line.							
	It is also appropriate to report the administration of each vaccine component on separate lines, e.g., reporting 5							
	lines for 90460 with 1 unit each and 3 lines for 90461 with 1 unit each. However, when reporting the same CPT or HCPCS code on multiple lines and/or on separate claims, the additional claim line(s) reported with the same							
	procedure code may be denied as a duplicate service.							
	Q: How are MFD values for immunization administration CPT codes 90472 and 90474 determined?							
9		edHealthcare follows the recommendations from the tee on Immunization Practices (ACIP) to set the MF						
	codes.	tee on immunization reactices (Noil ) to set the im	b value for additione	ii iiiiiiiaiiizatioi	r administration			
		t are examples of procedures or services where the rformed on a single date of service?	"description/verbiag	e" clearly indic	cates the number of			
10		ices that include "single lesion," "XX or more lesions be reported with 1 unit of service.	s," or "per date of ser	vice" in the co	de description			
	Q: Why	are many new CPT and HCPCS codes set at an M	FD value of 100?					
11	A: There is no CMS MUE value, data, or previous claim history for new codes. Setting the MFD value at 100							

allows claims to be processed and prevents most overpayments from occurring due to billing errors and data entry

errors. Once there is a CMS MUE value or claims data available on a code, the MFD value will be established based on the hierarchy of the Reimbursement Guidelines MFD Determination listed above.

**Q:** What is an example of determining the MFD value at the 100<sup>th</sup> percentile unless the 100<sup>th</sup> percentile exceeds the 98<sup>th</sup> percentile by greater than a factor of 4?

**A:** Statistical calculation: (A) x = (C); if (B) is greater than (C), then the 98<sup>th</sup> percentile is set for the MFD value. If (B) is less than or equal to (C), then the 100<sup>th</sup> percentile is set for the MFD value. Here are two examples of determining MFD values based on a factor of 4.

Code	(A) Units @ 98th	(B) Units @ 100th	(C) Factor of 4	Set MFD at:
86902	14	27	56	27
E0676	2	30	8	2
