

## Outpatient Hospital Inappropriate Primary Diagnosis Codes Policy, Facility

### IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY

You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare reimbursement policies may use Current Procedural Terminology (CPT®), Centers for Medicare and Medicaid Services (CMS) or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.

This reimbursement policy applies to all health care services billed on UB04 forms. Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design, and other factors are considered in developing reimbursement policy.

This information is intended to serve only as a general reference resource regarding UnitedHealthcare's reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare enrollees. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to, legislative mandates, the physician or other provider contracts, the enrollee's benefit coverage documents and/or other reimbursement, medical or drug policies. Finally, this policy may not be implemented the same way on the different electronic claims processing systems used by UnitedHealthcare due to programming or other constraints; however, UnitedHealthcare strives to minimize these variations.

UnitedHealthcare may modify this reimbursement policy at any time by publishing a new version of the policy on this Website. However, the information presented in this policy is accurate and current as of the date of publication.

### Application

**This reimbursement policy applies to UnitedHealthcare Community Plan Medicaid products.**

This reimbursement policy applies to services reported using the UB-04 Health Insurance Claim Form or its electronic equivalent or its successor form. This policy applies to all products and all network and non-network facilities and other qualified health care professionals, including, but not limited to, non-network authorized and percent of charge contract facilities.

### Policy

#### Overview

The International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) Official Guidelines for Coding and Reporting, developed through a collaboration of The Centers for Medicare and Medicaid Services (CMS), the National Center for Health Statistics (NCHS), and the Department of Health and Human Services (HHS), provides clear direction on the coding and sequencing of diagnosis codes. Utilizing the ICD-10-CM Official Guidelines for Coding and Reporting, this policy identifies diagnosis codes, which should never be billed as primary/principal on an outpatient hospital (UB-04) claim form or its electronic equivalent.

#### Reimbursement Guidelines

UnitedHealthcare Community Plan will deny claims where an inappropriate diagnosis is in box 67 on a UB-04 claim form or its electronic equivalent. When a code on the Inappropriate Primary Diagnosis List is listed as the primary/principal diagnosis on the claim form, the claim will be denied.

## Outpatient Hospital Inappropriate Primary Diagnosis Codes Determination

The following criteria, used to determine codes that are added to the Inappropriate Primary Diagnosis Codes list, are sourced to the Official ICD-10-CM Guidelines for Coding and Reporting, which govern the use of specific codes:

### Manifestation codes

- Manifestation codes cannot be reported as first listed or principal diagnoses. In most cases the manifestation codes will include the verbiage, “in diseases classified elsewhere.”

### “Code first” notes when not a manifestation code

- “Code first” notes occur with certain codes that are not specifically manifestation codes but may be due to an underlying cause. When a “code first” note is present which is caused by an underlying condition, the underlying condition is to be sequenced first if known.

### Sequela codes

- Coding of sequela generally requires two codes sequenced with the condition or nature of the sequela first and the sequela code second. Exceptions to this guideline are those instances where the code for the sequela is followed by a manifestation code identified in the tabular list and title, or the sequela code has been expanded at the fourth, fifth or sixth characters to include the manifestation(s).

### Malignant neoplasm associated with transplanted organ

- A malignant neoplasm of a transplanted organ should be coded as a transplant complication. Assign first the appropriate code for complications of transplanted organs and tissue (category T86), followed by code C80.2, Malignant neoplasm associated with transplanted organ.

### Conditions due to external or toxic agents

- For any conditions which have been caused by external or toxic agents, assign first the appropriate code for the external or toxic agent (category T51-T65), followed by the condition.

### Gout (Category M1A - M10)

- For lead-induced gout and lead-induced chronic gout, code first toxic effects of lead and its compounds (Category T56).
- For gout and chronic gout due to renal impairment, code first associated renal disease.
- For other secondary gout and other secondary chronic gout, code first associated condition.

### Symptoms and signs specifically associated with systemic inflammation and infection (Category R65)

- When systemic inflammatory response syndrome (SIRS) is present with a noninfectious condition and no subsequent infection is present, assign first the appropriate code for the underlying condition, followed by a code from Category R65.1, SIRS of non-infectious origin.
- Severe sepsis requires a code for the underlying systemic infection be sequenced first, followed by a code from category R65.2, Severe sepsis.

### Burns and corrosions of external body surfaces specified by site, or those confined to eye and internal organs (Category T20-T28)

- For corrosion burns of external body surfaces specified by site or those confined to eye and internal organs, assign first the appropriate code for the chemical and intent (Category T51-T65), followed by the corrosion burn code. Non-corrosion burns may be sequenced first.

### Poisoning by adverse effects of and underdosing of drugs, medicaments, and biological substances (Category T36-T50)

- For adverse effects of drugs, medicaments, and biological substances, assign first the appropriate code for the nature of the adverse effect, followed by the appropriate code for the adverse effect of the drug (Category T36-T50).
- Codes for underdosing (Category T36-T50) should never be assigned as principal or first-listed diagnosis codes.
- Codes for poisoning (Category T36-T50) may be sequenced first.

#### External causes of morbidity (Category V00-Y99)

- The external cause of morbidity codes should never be sequenced as the first-listed or principal diagnosis, as they are intended only to provide data for injury research and evaluation of injury prevention strategies.

#### Factors influencing health status (Category of codes beginning with Z)

- Codes Z15, Genetic susceptibility to malignant neoplasms and other disease. These codes should only be reported as secondary diagnoses.
- Category Z16, Resistance to antimicrobial drugs. Sequence the infection code first.
- Category Z17, Estrogen receptor status. Sequence the malignant neoplasm of breast code first.
- Category Z19, Hormone sensitivity malignancy status. Sequence the malignant neoplasm code first.
- Code Z33.1, Pregnant state. This code is a secondary code only for use when the pregnancy is in no way complicating the reason for visit. Otherwise, a code from the obstetric chapter is required.
- Category Z37, Outcome of Delivery. The outcome of delivery (Category Z37) should be included on all maternal delivery records, and it is always sequenced as a secondary code.
- Category Z3A, Weeks of gestation. Sequence first complications of pregnancy, childbirth, and the puerperium (O00-O9A), followed by a code from Category Z3A to identify the specific week of the pregnancy.
- Z55-Z65, Persons with potential health hazards related to socioeconomic and psychosocial circumstances. These codes should only be reported as secondary diagnoses.
- Category Z68, Body Mass Index (BMI). The BMI codes should only be reported as secondary diagnoses.
- Category Z91.12, Patient's intentional underdosing of medication regimen. Sequence the underdosing of medication (T36-T50) first.
- Category Z91.13, Patient's unintentional underdosing of medication regimen. Sequence the underdosing of medication (T36-T50) first.
- Code Z91.83, Wandering in diseases classified elsewhere. Sequence the underlying disorder first.
- Code Z92.82, Status post administration of tPA in a different facility within the last 24 hours prior to admission to current facility. Sequence the condition requiring tPA first.

Refer to the Inappropriate Primary Diagnosis Code List for all codes applicable to this policy.

#### State Exceptions

<b>Kansas</b>	Kansas uses a customized, state identified Inappropriate Primary ICD-10 Diagnosis Codes list. (This list is a combination codes from ICD-10 Inappropriate Primary DX list and the CMS Medicare Unacceptable Primary Diagnosis Code List).
<b>Louisiana</b>	Louisiana is exempt from this policy.
<b>Massachusetts</b>	Massachusetts is exempt from this policy.
<b>New York</b>	<ul style="list-style-type: none"> <li>New York Health Homes are excluded from this policy.</li> <li>Plan ID NYCDFHP Product ID NYCD NYCDT NYCDB allows Z65.9 to be primary for following CPT codes 90832, 90834, 90837, 90846, 90847, 90849, 90853.</li> </ul>
<b>Ohio</b>	OHIO MMP is excluded from this policy.
<b>Rhode Island</b>	Rhode Island uses a customized, state identified Inappropriate Primary ICD-10 Diagnosis Codes list which is included in the policy
<b>Texas</b>	<p>Texas Medicaid <b>does not</b> allow the following category to be submitted in the primary or referenced diagnosis:</p> <ul style="list-style-type: none"> <li>Diagnosis in the International Classification of Diseases for Oncology, 3<sup>rd</sup> Edition (ICD-O-3)</li> </ul> <p>Texas Medicaid allows for the following ICD-10 diagnosis code to be submitted in the primary position:</p> <ul style="list-style-type: none"> <li>Z23 – if immunization is the only service provided during an office visit.</li> </ul>

## Questions and Answers

1	<p><b>Q: Does this policy apply to Inpatient Hospital claims?</b></p> <p><b>A:</b> No, this policy only applies to outpatient hospital claims. Inpatient hospital claims select the principal diagnosis code based on the Uniform Hospital Discharge Data Set (UHDDS). Inpatient hospital claims report the appropriate ICD-10-CM diagnosis and the ICD-10 PCS procedures codes.</p>
