

ATLAS (Addiction Treatment Locator, Assessment and Standards Platform)

ATLAS is an online Substance Use Disorder Treatment Locator tool created by Shatterproof that assists in the search and comparison of addiction treatment facilities. This valuable resource is accessible not only to your facility staff as part of treatment planning activities but can be provided to your patients and their loved ones. Your patients and their loved ones can access self assessment tools, education on types of treatment, as well as review national principles of care in addition to being able to search for specific treatment options.

The specific section for providers offers Provider's Clinical Support System (PCSS) resources in addition to other resources related to effective personalized treatment options and planning, virtual trainings, coordinated care and recovery support service resources. Your facility and offered services can also be included within the ATLAS system.

ATLAS can be accessed at <https://www.treatmentatlas.org/>

Inquires regarding partnering with Shatterproof on ATLAS can be directed to ATLAS@shatterproof.org
