

# Pregnancy notification

Digital tool – Care Conductor and Notification of Pregnancy

## Overview

**Care Conductor and Notification of Pregnancy** is a new tool on Link that you can use to digitally notify UnitedHealthcare of pregnant members.

## What's the benefit?

By digitally notifying UnitedHealthcare of pregnant members you are:

- **Reducing unnecessary faxes** by submitting through Link, a self-service tool already available in your workflow.
- **Helping to identify members who may have a high-risk pregnancy** – This allows us to identify and coordinate proactive care to help improve outcomes.
- **Connecting your patients with additional resources** – The UnitedHealthcare case management team will reach out with support materials as needed, which could help address food, housing and safety needs.

## How to access

To access the Care Conductor and Notification of Pregnancy tool, go to [UHCprovider.com](https://UHCprovider.com) and select “Sign in to Link.”

To sign up for Link, visit [UHCprovider.com/newuser](https://UHCprovider.com/newuser).
