

Include detailed description to process procedure code T2029 claims

Claims for procedure code T2029 should be submitted with a detailed description in the claim image. Because T2029 is an unlisted code, a detailed description should be included to determine the correct reimbursement amount.

Without a description, claims may require additional review and could result in processing delays or pricing inaccuracies.

How you can help

To ensure timely and accurate T2029 claim processing, include detailed line descriptions that clearly list:

- The item
- Service
- Modification provided

Additionally, verify all claim lines requiring descriptions are present on claim submissions.

We must review the accompanying description to apply the appropriate negotiated rate within the authorization. Missing or incomplete descriptions could delay claim adjudication and possibly require additional outreach to obtain the necessary information.
