Phishing Attempt Alert

The Texas Health and Human Services Commission (HHSC) learned about a phishing attempt where an organization received an email claiming to be from HHSC and included the HHSC logo. The email linked to a fake HHSC portal and requested the recipient to sign in with an email address and password.

If you receive an email that you believe is a phishing attempt, please send the original email **as an attachment** to csoc-alerts@hhs.texas.gov. HHSC will work with the appropriate entities to block, and when appropriate, request the website be taken down.

As a reminder, if you receive an unexpected or suspicious email, **don't click on the links, open the attachments, or accept the invitation.**

Thank you for your attention to this matter.
