# Understanding your prescription drug list

## What is a prescription drug list (PDL)?

A PDL is a list of prescribed medications or other pharmacy care products or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications.

To create the list, UnitedHealthcare® is guided by the Individual Exchange Pharmacy Management Committee. This group reviews which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

### About this PDL

Where differences between this document and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details.

## How do I use my PDL?

You and your provider can use the PDL to help you choose the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. You can reference this list when you see your provider. Bring this list with you when you see your provider. If your medication is not listed here, please visit [myuhc.com/exchange](https://myuhc.com/exchange) or the Member Services number on your health plan ID card.

Some medications on your PDL have extra requirements before they can be covered. A few of the most common coverage programs are prior authorization (PA), step therapy (ST) and quantity limits (QL). We use programs like these to help make sure the medication you take is safe and effective. Check your plan documents for more information. If you want to see if you take a medication in one of these programs, please visit [myuhc.com/exchange](https://myuhc.com/exchange) or the Member Services number on your health plan ID card.

- **Prior authorization:** UnitedHealthcare requires you or your physician to obtain prior authorization for certain drugs. This means that you will need to get approval from UnitedHealthcare before you fill your prescriptions. If you don't get approval, the drug may not be covered.
- **Step therapy:** In some cases, UnitedHealthcare requires you to first try certain drugs to treat your medical condition before we cover another drug for that condition.
- **Quantity limits:** For certain drugs, UnitedHealthcare limits the amount of the drug being filled per copayment or over a certain period of time.

## What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by UnitedHealthcare. This is how much you will pay when you fill a prescription at a network pharmacy.

## Can the PDL change?

Most changes in drug coverage happen on January 1, but during the year UnitedHealthcare may add or remove drugs on the PDL, move them to different cost-sharing tiers, or add new restrictions.

When a medication changes tiers, you may have to pay a different amount for that medication. Talk to your provider to learn about alternatives.

## Why are some medications excluded from coverage?

A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

## What if I don't agree with a decision about an excluded medication?

You, your authorized representative or your provider can ask for a coverage request by calling the number on your member ID card. Once the request is received, a decision will be provided within 72 hours, unless state law requires faster response or

there are exigent circumstances and an expedited review is requested, in which case a decision will be provided in 24 hours. If the request is denied, information will be provided describing the process to appeal that decision and request an external review.

## Medication tips

### What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less.

### What if my doctor writes a brand-name prescription?

If your provider gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

### What if I am taking a specialty medication?

Specialty medications are for rare or complex conditions and are usually higher-cost medications.

Please note, not all specialty medications may be available at a retail pharmacy. If you have question on how to access covered specialty medications, call the number on your ID card.

### How can I get a 90-day supply of my medication?\*

Obtaining prescription medications through OptumRx® home delivery may provide a 90-day supply of your prescription medication, and may reduce the cost you pay for your prescription medication.

### How can I get a 90-day supply at Retail Pharmacy?\*

In addition to being able to obtain up to a 90-day supply of medication through our mail order pharmacy, you may be able to receive up to a 90-day supply of your prescription medication through a retail network participating preferred pharmacy. Please check your plan documents to determine if your plan provides a 90-day supply at a retail network preferred pharmacy.

### Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your provider about available OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

\* Not all medications may qualify for 90-day supply through OptumRx home delivery or preferred pharmacy retail network.

# Reading your PDL

The PDL gives you choices so you and your provider can decide your best course of treatment. In this PDL, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol). There are two ways to find your drug within the PDL:

1. The drugs in this formulary are grouped into categories depending on the medical conditions that they are used to treat. For example, drugs used to treat an infection condition are listed under the category, Antibacterial. If you know what your drug is used for, look for the category name, then look under the category name for your drug.
2. Alphabetical Listing – if you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all the drugs included in this document for both brand name drugs and generic drugs. Review the Index to find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to that page listed in the Index and find the name of your drug in the first column of the list.

## Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost.

Drug Tier	Cost Share	Helpful Tips
Tier 1	\$	
Tier 2	\$\$	Drugs in lower tiers will have lower cost shares. If you are prescribed a medication on a higher tier, you should discuss with your provider if a lower tier medication may be appropriate for your condition.
Tier 3	\$\$\$	
Tier 4	\$\$\$\$	
Tier 5	\$\$\$\$\$	
HCR \$0 copay	\$0	Preventive products listed in the HCR \$0 Tier are available at zero cost.

## Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan sets how these medications may be covered for you.

PA	<b>Prior authorization</b> – Your provider is required to give UnitedHealthcare more information to determine coverage and obtain approval.
QL	<b>Quantity limit</b> – Medication may be limited to a certain quantity.
ST	<b>Step therapy</b> – Must try lower-cost medication(s) before a higher-cost medication can be covered.
HCR \$0 copay	<b>HCR \$0 copay</b> – These drugs may be available at zero cost if specific requirements are met.
