COVERAGE RATIONALE

Surgical Extraction of an Erupted Tooth

Surgical Extraction of an Erupted Tooth is indicated for any of the following:

- No clinical crown is visible in the mouth
- The fracture of a tooth or roots during a non-surgical extraction procedure
- Erupted teeth with unusual root morphology (dilacerations, cementosis)
- Erupted teeth with developmental abnormalities that would make non-surgical extraction unsafe or cause harm
- When fused to an adjacent tooth
- In the presence of periapical lesions
- For maxillary posterior teeth whose roots extend into the maxillary sinus
- When tooth has been crowned or been treated endodontically

Surgical Removal of Residual Tooth Roots

Surgical Removal of Residual Tooth Roots is indicated when tooth roots or fragments of tooth roots remain in the bone following a previous incomplete tooth extraction.

DEFINITIONS

Surgical Extraction of an Erupted Tooth: A tooth requiring removal of bone and/or sectioning of tooth, and including elevation of mucoperiosteal flap if indicated. Includes related cutting of gingiva and bone, removal of tooth structure, minor smoothing of socket bone and closure. (ADA, 2017)

APPLICABLE CODES

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this guideline does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Clinical Policies and Coverage Guidelines may apply.

DESCRIPTION OF SERVICES

Surgical extraction is the removal of a tooth that presents clinically with a condition that does not safely or adequately allow access using a non-surgical approach. Surgical extractions require an incision, elevation, and bone removal when indicated. It may be an entire tooth, or any part of a tooth, including retained roots.

GUIDEINE HISTORY/REVISION INFORMATION

<table>
<thead>
<tr>
<th>Date</th>
<th>Action/Description</th>
</tr>
</thead>
</table>
| 01/01/2020 | Coverage Rationale

- Simplified content

**Surgical Extraction of an Erupted Tooth**
- Revised list of indications; removed:
  - There is insufficient remaining clinical crown to allow a non-surgical extraction
  - When severe crowding or ectopic position of the tooth is present

**Surgical Removal of Residual Tooth Roots**
- Revised list of indications; removed:
  - Extreme tooth decay resulting in the destruction of the dentition to the extent that only root tips remain

**Applicable Codes**
- Updated list of applicable CDT codes to reflect annual code edits; added D7922

**Supporting Information**
- Updated Description of Services and References section to reflect the most current information
- Archived previous policy version DCG005.04

INSTRUCTIONS FOR USE

This Dental Coverage Guideline provides assistance in interpreting UnitedHealthcare standard dental benefit plans. When deciding coverage, the member specific benefit plan document must be referenced as the terms of the member specific benefit plan may differ from the standard dental plan. In the event of a conflict, the member specific benefit plan document governs. Before using this guideline, please check the member specific benefit plan document and any applicable federal or state mandates. UnitedHealthcare reserves the right to modify its Policies and Guidelines as necessary. This Dental Coverage Guideline is provided for informational purposes. It does not constitute medical advice.
