Policy

Overview

This policy addresses edits involving diagnosis (ICD10-CM) codes and CPT® codes with age limitations. Age designations are assigned to select World Health Organization (WHO) International Classification of Diseases, Tenth Revision ICD10-CM) codes based on code descriptions or on publications and guidelines from sources such as professional specialty societies, the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA) or the AHA (American Hospital Association) Coding Clinic.

Reimbursement Guidelines

UnitedHealthcare Value & Balance Exchange develops edits for age for certain codes based on code descriptions, publications and guidelines from sources such as professional specialty societies or similar institutions and from the entities that create the codes (WHO, CMS, AMA). These guidelines can be either definitive or interpretive.

UnitedHealthcare Value & Balance Exchange will apply age edits when diagnosis &/or procedure codes are reported for the appropriate patient's age. Diagnosis &/or procedure codes reported inappropriately will be considered billing errors and will not be reimbursed.

Definitions

Definitive Source	Definitive sources contain the exact codes, modifiers or very specific instructions from the given source.
Interpretive Source	An edit source that includes guidelines; however, no exact or specific code or modifier information is listed. Therefore, an interpretation must be made as to what codes correlate to the guidelines. Additionally, an interpretation may be applied to surrounding or similar codes based on related definitively sourced edits.
