**Related Medicare Advantage Policy Guidelines:**

- Cardiac Pacemaker Evaluation Services (NCD 20.8.1)
- Cardiac Pacemakers: Single Chamber and Dual Chamber Permanent Cardiac Pacemakers (NCD 20.8.3)
- External Counterpulsation (ECP) Therapy for Severe Angina (NCD 20.20)
- Implantable Automatic Defibrillators (NCD 20.4)
- Leadless Pacemakers (NCD 20.8.4)
- Self-Contained Pacemaker Monitors (NCD 20.8.2)
- Transtelephonic Monitoring of Cardiac Pacemakers (NCD 20.8.1.1)

I. COVERAGE

**Coverage Statement:** Cardiac pacemakers, internal and external pacemakers are covered when Medicare coverage criteria are met.

**DME Face to Face Requirement:** Effective July 1, 2013, Section 6407 of the Affordable Care Act (ACA) established a face-to-face encounter requirement for certain items of DME (*including automatic external defibrillator garment with electronic analysis*). For DME Face to Face Requirement information, refer to the *Coverage Summary for Durable Medical Equipment (DME), Prosthetics, Corrective Appliances/Orthotic (Non-Foot Orthotics) and Medical Supplies Grid.*

**Guidelines/Notes:**

1. **Cardiac Pacemakers (single-chamber or dual chamber)**
   Cardiac pacemakers (single-chamber or dual chamber) are covered when criteria are met.
   - *For dates of service March 16, 1983 – August 12, 2013,* see the *NCD for Cardiac Pacemaker (20.8).* (Accessed May 28, 2020)
   - *For dates of services on or after August 13, 2013,* see the *NCD for Cardiac Pacemakers: Single Chamber and Dual Chamber Permanent Cardiac Pacemakers (20.8.3).* (Accessed May 28, 2020)
   - *For services for post-implant follow-up and evaluation of implanted cardiac pacemakers; see the NCD for Cardiac Pacemaker Evaluation Services (20.8.1).* (Accessed May 28, 2020)

2. **Leadless Pacemakers (CPT Codes 33274 and 33275)**
   On January 18, 2017, the Centers for Medicare & Medicaid Services (CMS) issued a decision memo stating it will finalize its proposal to cover leadless pacemakers through Coverage with Evidence Development (CED). CMS covers leadless pacemakers when procedures are performed in FDA approved studies. CMS also covers, in prospective longitudinal studies, leadless pacemakers that are used in accordance with the FDA approved label for devices that have either:
   - An associated ongoing FDA approved post-approval study; or
   - Completed an FDA post-approval study.

   Refer to the *NCD for Leadless Pacemakers (NCD 20.8.4).* (Accessed May 28, 2020)

   Also see the *Coverage Summary for Experimental Procedures and Items, Investigational Devices and Clinical Trials.*

   Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. These policies are available at [http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx](http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx).

3. **Pulmonary Artery Pressure Measurements (CardioMEMS™ HF System CPT codes 33289, 93264 and C2624)**
   - Medicare does not have a National Coverage Determination (NCD) for Pulmonary Artery Pressure Measurements (CardioMEMS™ HF System).
   - Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. For state-specific LCDs/LCAs,
• **CardioMEMS™ HF System is a Category B IDE device.** Refer to the Coverage Summary for Experimental Procedures and Items, Investigational Devices and Clinical Trials for coverage information on Category B IDE devices.

• **See the CMS Approved IDE Studies information website for CardioMEMS™ HF System/Hemodynamic-GUIDEd Management of Heart Failure (GUIDE-HF) at** https://www.cms.gov/Medicare/Coverage/IDE/Approved-IDE-Studies-Items/G170258-NCT03387813.html.

• **Committee approval date:** June 16, 2020

• **Accessed June 12, 2020**

4. **Cardiac Pacemaker Monitoring**

   a. Self-contained pacemaker monitors may be covered when prescribed by the treating physician with a cardiac pacemaker.

      1) Digital electronic pacemaker monitor provides the patient with an instantaneous digital readout of his pacemaker pulse rate. Use of this device does not involve professional services until there has been a change of five pulses (or more) per minute above or below the initial rate of the pacemaker; when such change occurs, the patient contacts his physician.

      2) Audible/Visible signal pacemaker monitor produces an audible and visible signal which indicates the pacemaker rate. Use of this device does not involve professional services until a change occurs in these signals; at such time, the patient contacts his physician.

   **Note:** The design of the self-contained pacemaker monitor makes it possible for the patient to monitor his pacemaker periodically and minimizes the need for regular visits to the outpatient department of the provider.

   b. Trans-telephonic cardiac pacemaker monitoring

      1) Limited to lithium battery powered pacemakers

      2) Transtelephonic cardiac monitoring may be done by:

         a) Member’s physician

         b) Outside entity requires an annually renewed physician’s prescription and may include:

            • Commercial monitoring service
            • Hospital outpatient department
            • Pacemaker clinic

      3) Frequency of monitoring

         a) Responsibility of member’s physician to determine frequency:

         b) Frequency may vary over time and require modifications

      4) In order for trans-telephonic cardiac monitoring services to be covered, the services must consist of the following:

         a) Minimum 30 second readable strip of the pacemaker in the free running mode

         b) Unless contraindicated, a minimum 30 second readable strip of the pacemaker in the magnetic mode

         c) Minimum 30 seconds of readable ECG/EKG strip
5. **Implantable Cardioverter Defibrillators (ICDs)**

An ICD is an electronic device designed to diagnose and treat life-threatening ventricular tachyarrhythmias.

Effective for services performed on or after February 15, 2018, CMS has determined that the evidence is sufficient to conclude that the use of ICDs, (also referred to as defibrillators) is reasonable and necessary when criteria are met.

*See the NCD for Implantable Automatic Defibrillators (20.4). (Accessed May 28, 2020)*

6. **Subcutaneous Implantable Automatic Defibrillators** (CPT codes 33270, 33271, 33273, 93260, 93261 and 93644)

Subcutaneous implantable automatic defibrillators are covered when criteria are met. *See the NCD for Implantable Automatic Defibrillators (20.4). (Accessed June 12, 2020)*

*Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. These policies are available at http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.*

7. **Automatic External Defibrillators**

- Medicare does not have a National Coverage Determination (NCD) for automatic external defibrillators.
- *Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist for all 50 states and compliance with these policies is required where applicable. All 4 DME MACs have the same coverage criteria for automatic external defibrillators.*
- Automatic external defibrillators are covered when criteria are met. For coverage criteria, refer to the DME MAC LCD/LCA for Automatic External Defibrillators (L33690).
- **Committee approval date: June 12, 2020**
- Accessed June 12, 2020

8. **Anesthesia for Cardiac Pacemaker Surgery**

Anesthesia for cardiac pacemaker surgery is covered when reasonable and necessary. *See the NCD for Anesthesia in Cardiac Pacemaker Surgery (10.6). (Accessed May 28, 2020)*

9. **Intraoperative Ventricular Mapping**

Intraoperative ventricular mapping is covered only for the uses and medical conditions:

- Localize accessory pathways associated with the Wolff-Parkinson-White (WPW) and other preexcitation syndromes;
- Map the sequence of atrial and ventricular activation for drug-resistant supraventricular tachycardias;
- Delineate the anatomical course of His bundle and/or bundle branches during corrective cardiac surgery for congenital heart diseases; and
- Direct the surgical treatment of patients with refractory ventricular tachyarrhythmias.

*See the NCD for Intraoperative Ventricular Mapping (20.11). (Accessed May 28, 2020)*
10. **External Counterpulsation (ECP) Therapy**

External counterpulsation (ECP) therapy for severe angina is covered when criteria are met. See the [NCD for External Counterpulsation Therapy for Severe Angina (20.20)](https://www.accessdata.fda.gov/cdrh_docs/pdf2/NPC20200219.pdf) (Accessed May 28, 2020)
