Coverage Summary

Cardiovascular Diagnostic Procedures

Approved by: UnitedHealthcare Medicare Benefit Interpretation Committee  Last Review Date: 08/20/2019

Related Medicare Advantage Policy Guidelines:
- Ambulatory Blood Pressure Monitoring (NCD 20.19)
- Biomarkers in Cardiovascular Risk Assessment
- Cardiac Output Monitoring by Thoracic Electrical Bioimpedance (TEB) (NCD 20.16)
- Cardiointegram (CIG) as an Alternative to Stress Test or Thallium Stress Test (NCD 20.27)
- Diagnostic Endocardial Electrical Stimulation (Pacing) (NCD 20.12)
- Digital Subtraction Angiography (NCD 220.9)
- Displacement Cardiography (NCD 20.24)
- Electrocardiographic Services (NCD 20.15)
- External Electrocardiographic Recording
- Microvolt T-Wave Alternans (MTWA) (NCD 20.30)
- Noninvasive Tests of Carotid Function (NCD 20.17)
- Percutaneous Coronary Interventions
- Plethysmography (NCD 20.14)

This information is being distributed to you for personal reference. The information belongs to UnitedHealthcare and unauthorized copying, use, and distribution are prohibited. This information is intended to serve only as a general reference resource and is not intended to address every aspect of a clinical situation. Physicians and patients should not rely on this information in making health care decisions. Physicians and patients must exercise their independent clinical discretion and judgment in determining care. Each benefit plan contains its own specific provisions for coverage, limitations, and exclusions as stated in the Member’s Evidence of Coverage (EOC)/Summary of Benefits (SB). If there is a discrepancy between this policy and the member’s EOC/SB, the member’s EOC/SB provision will govern. The information contained in this document is believed to be current as of the date noted.

The benefit information in this Coverage Summary is based on existing national coverage policy, however, Local Coverage Determinations (LCDs) may exist and compliance with these policies is required where applicable.

There are instances where this document may direct readers to a UnitedHealthcare Commercial Medical Policy, Medical Benefit Drug Policy, and/or Coverage Determination Guideline (CDG). In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence (Medicare IOM Pub. No. 100-16, Ch. 4, §90.5).

INDEX TO COVERAGE SUMMARY

I. COVERAGE
   1. Diagnostic Endocardial Electrical Stimulation (EES)
   2. Digital Subtraction Angiography (DSA)
   3. Digoxin Therapeutic Drug Assay
   4. Electrocardiographic (EKG) Services
   5. HIS Bundle Study
   6. Cardiac catheterization performed other than a hospital setting
   7. Thoracic Electrical Bioimpedance (TEB)
   8. Displacement Cardiography (including Cardiokymography and Photokymography)
   9. Cardiointegram (CIG)
   10. Ambulatory Blood Pressure Monitoring
   11. Non-invasive Test of Carotid Function (Direct and Indirect)
   12. Plethysmography
   13. Microvolt T-wave Alternans
I. COVERAGE

**Coverage Statement:** Cardiovascular diagnostic procedures are covered when Medicare coverage criteria are met.

**Guidelines/Notes:**

The following is not an all inclusive list of cardiac diagnostic procedures, but reflects diagnostic procedures based on the National Coverage Determinations (NCDs) listed below.

1. **Diagnostic Endocardial Electrical Stimulation (EES)**
   Diagnostic endocardial electrical stimulation is covered when criteria are met. *See the NCD for Diagnostic Endocardial Electrical Stimulation (Pacing) (20.12)*. (Accessed January 3, 2019)

2. **Digital Subtraction Angiography (DSA)**
   Digital subtraction angiography is covered the same as conventional angiography. Payment for DSA should not exceed, and may be less than, that being paid for conventional angiographic techniques. *See the NCD for Digital Subtraction Angiography (220.9)*. (Accessed January 3, 2019)

3. **Digoxin Therapeutic Drug Assay**
   Digoxin therapeutic drug assay is covered. For specific indications, *see the NCD for Digoxin Therapeutic Drug Assay (190.24)*. (Accessed January 3, 2019)

4. **Electrocardiographic (EKG) Services**
   EKG services, including Electrocardiogram Ambulatory Electrocardiography (AECG) (Holter monitor or Real-time EKG), Cardiac Event Monitor or Event Recorders are covered when specific criteria are met. *See the NCD for Electrocardiographic Services (20.15)* (Accessed January 3, 2019)

   Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. These LCDs/LCAs are available at [http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx](http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx). (Accessed August 1, 2019)

5. **HIS Bundle Study**
   HIS Bundle Study is covered for selected patients. For specific indications, *see the NCD for HIS Bundle Study (20.13)*. (Accessed January 3, 2019)

6. **Cardiac Catheterization Performed Other than a Hospital Setting**
   Cardiac catheterization performed other than a hospital setting is a covered service. The procedure may also be covered when performed in a freestanding clinic when the carrier, in consultation with the appropriate Peer Review Organization (PRO), determines that the
procedure can be performed safely in all respects in the particular facility.

In the absence of an NCD, local Medicare Contractors, UnitedHealthcare Medicare Advantage can determine whether a cardiac catheterization performed in a freestanding facility is reasonable and necessary.

See the Decision Memo for Cardiac Catheterization Performed In Other Than A Hospital Setting (CAG-00166N). (Accessed January 3, 2019)

Note: CMS repealed the NCD for Cardiac Catheterization Performed in Other than a Hospital Setting (20.25) effective January 12, 2006. (Accessed January 3, 2019)

7. Thoracic Electrical Bioimpedance (TEB)

TEB devices are covered when specific patient criteria are met. See the NCD for Cardiac Output Monitoring by Thoracic Electrical Bioimpedance (20.16). (Accessed January 3, 2019)

8. Displacement Cardiography (including Cardiokymography and Photokymography)

Displacement cardiography, including cardiokymography and photokymography, is a noninvasive diagnostic test used in evaluating coronary artery disease.

a) Cardiokymography is a covered service only when it is used as an adjunct to electrocardiographic stress testing in evaluating coronary artery disease and only when the following clinical indications are present:
   - For male patients, atypical angina pectoris or nonischemic chest pain; or
   - For female patients, angina, either typical or atypical

b) Photokymography is not covered.

See the NCD for Displacement Cardiography (20.24). (Accessed January 3, 2019)

Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. These LCDs/LCAs are available at http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx. (Accessed January 3, 2019)

9. Cardiointegram (CIG)

Cardiointegram (CIG) is not a covered benefit as it is considered by Medicare as investigational. See the NCD for Cardiointegram (CIG) as an Alternative to Stress Test or Thallium Stress Test (20.27). (Accessed January 3, 2019)

10. Ambulatory Blood Pressure Monitoring

Ambulatory blood pressure monitoring is covered when criteria are met. See the NCD for Ambulatory Blood Pressure Monitoring (20.19). (Accessed January 3, 2019)

Also see the UnitedHealthcare Commercial Coverage Determination Guideline for Durable Medical Equipment (DME), Prosthetics, Corrective Appliances/Orthotics (Non-Foot Orthotics) and Medical Supplies Grid.

11. Non-invasive Test of Carotid Function (Direct and Indirect)

12. Plethysmography

Plethysmography is covered when Category I tests criteria are met. Category II tests are considered experimental and therefore, not covered. See the NCD for Plethysmography
13. Microvolt T-wave Alternans

Microvolt T-wave Alternans diagnostic testing is covered for the evaluation of patients at risk for SCD, only when the spectral analysis method is used.

Microvolt T-wave Alternans diagnostic testing is not covered for the evaluation of patients at risk for SCD if measurement is not performed employing the spectral analysis.

See the NCD for Microvolt T-Wave Alternans (20.30). (Accessed January 3, 2019)

NCD Update: On January 13, 2015, Centers for Medicare & Medicaid Services has decided that no National Coverage Determination (NCD) is appropriate at this time for microvolt T-wave alternans (MTWA) testing using the modified moving average (MMA) method for the evaluation of patients at risk for sudden cardiac death (SCD). National non-coverage will be removed. Medicare coverage of MTWA using the MMA method will be determined by the local contractors. The CMS final decision memo pertaining to this update is available at http://www.cms.gov/medicare-coverage-database/details/nca-decision-memo.aspx?NCAId=275. (Accessed January 3, 2019)

14. Intravascular Coronary Ultrasound (CPT codes 92978 and 92979)

- Medicare does not have a National Coverage Determination (NCD) for intravascular coronary ultrasound.
- Local Coverage Determinations (LCDs)/Local Coverage Article (LCAs) exist for all 50 states and compliance with these policies is required where applicable. For state-specific LCDs/LCAs, refer to the LCD Availability Grid (Attachment A).
- Committee approval date: August 20, 2019
- Accessed August 1, 2019

15. Arterial Compliance Testing, Using Waveform Analysis (CPT code 93050)

- Medicare does not have a National Coverage Determination (NCD) for arterial compliance testing, using waveform analysis.
- Local Coverage Determinations (LCDs)/Local Coverage Article (LCAs) exist and compliance with these policies is required where applicable. For state-specific LCDs/LCAs, refer to the LCD Availability Grid (Attachment B).
- For states with no LCDs/LCAs, see the UnitedHealthcare Commercial Medical Policy for Cardiovascular Disease Risk Tests for coverage guidelines. (IMPORTANT NOTE: After checking the LCD Availability Grid and searching the Medicare Coverage Database, if no state LCD/LCA is found, then use the above referenced policy.)
- Committee approval date: January 15, 2019
- Accessed May 1, 2019

II. DEFINITIONS

Diagnostic Services: A service is “diagnostic” if it is an examination or procedure to which the patient is subjected, or which is performed on materials derived from a hospital outpatient, to obtain information to aid in the assessment of a medical condition or the identification of a disease. Among these examinations and tests are diagnostic laboratory services such as hematology and

IV. REVISION HISTORY

08/20/2019 Guideline 14 [Intravascular Coronary Ultrasound (CPT codes 92978 and 92979)]

- Revised language pertaining to applicable Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) to indicate LCDs/LCAs exist for all 50 states and compliance with these policies is required where applicable
- Removed default guidelines for states with no LCDs/LCAs
