Chemotherapy and Associated Drugs and Treatments

Policy Number: MCS017.04
Approval Date: October 5, 2022

Coverage Guidelines

Chemotherapy, and associated drugs and treatments are covered when Medicare coverage criteria are met.

Note: The guidelines in this Coverage Summary are for specific procedures only. For procedures not addressed in this Coverage Summary, refer to the Medicare Coverage Database to search for applicable coverage policies (National Coverage Determination, Local Coverage Determinations and Local Coverage Articles).

Chemotherapy, Immunotherapy and Hormonal Agents

Chemotherapy, immunotherapy, and hormonal agents are covered when medically indicated and used according to FDA approved indications or as a part of an anticancer chemotherapeutic regimen or cancer treatment regimen.

FDA approved drug or biological is one that has received final marketing approval by the Food and Drug Administration (FDA) and, as a part of its labeling, contains its recommended uses and dosages as well as adverse reactions and recommended precautions in using it.

Refer to the Medicare Benefit Policy Manual, Chapter 15, §50.4.1 – Approved Use of Drug. (Accessed September 26, 2022)

Off-Label Use of Drugs and Biologicals in an Anti-Cancer Chemotherapeutic Regimen

Off-label, medically accepted indications of Food and Drug Administration (FDA) approved drugs and biologicals used in an anti-cancer chemotherapeutic regimen are identified under the conditions described below.

A regimen is a combination of anti-cancer agents clinically recognized for the treatment of a specific type of cancer.

Off-label, medically accepted indications are supported in either one or more of the compendia or in peer-reviewed medical literature. Compendia documentation or peer-reviewed literature supporting off-label use by the treating physician may also be requested.
**Compendia List**

Do not deny coverage based solely on the absence of FDA-approved labeling for the use, if the use is supported by any of the following compendia and the use is not listed as unsupported, not indicated, not recommended, or equivalent terms, in any of the following compendia:

- American Hospital Formulary Service-Drug Information (AHFS-DI) (Existing)
- National Comprehensive Cancer Network (NCCN) Drugs and Biologics Compendium (Effective June 5, 2008). For NCCN access, see below.
- Micromedex DrugDex (Effective June 10, 2008)
- Clinical Pharmacology (Effective July 2, 2008)
- Lexi-Drugs (Effective August 12, 2015)

The listed compendia employ various rating and recommendation systems that may not be readily cross-walked from compendium to compendium.

In general, a use is identified by a compendium as medically accepted if the:

- Indication is a category 1 or 2A in NCCN, or class I, class IIa, or class IIb in DrugDex; or
- Narrative text in AHFS-DI or clinical pharmacology is supportive, or
- Indication is listed in Lexi-Drugs as “Use: Off-Label” and rated as “Evidence Level A”.

A use is not medically accepted by a compendium if the:

- Indication is a category 3 in NCCN or a class III in DrugDex; or
- Narrative text in AHFS or clinical pharmacology is “not supportive,”; or
- Indication is listed in Lexi-Drugs as “Use: Unsupported”.

The complete absence of narrative text on a use is considered neither supportive nor non-supportive.

**Compendia Access for Providers (NCCN)**

For convenience, participating providers can access the link to the National Comprehensive Cancer Network (NCCN) Drugs and Biologics Compendium on the provider portal at [UHCprovider.com](http://UHCprovider.com) [Menu > Resource Library > NCCN Drugs and Biologics Compendium].

For other compendia referenced in the coverage guidelines for Off-label Use of Drugs and Biologicals in an Anti-Cancer Chemotherapeutic Regimen, free access is not available at this time through UHCprovider.com.

(Accessed September 26, 2022)

**Use Supported by Clinical Research that Appears in Peer-Reviewed Medical Literature**

Peer-reviewed medical literature may appear in scientific, medical, and pharmaceutical publications in which original manuscripts are published, only after having been critically reviewed for scientific accuracy, validity, and reliability by unbiased, independent experts prior to publication. In-house publications of entities whose business relates to the manufacture, sale, or distribution of pharmaceutical products are excluded from consideration. Abstracts (including meeting abstracts) are excluded from consideration.

In determining whether an off-label use is supported, evaluate the evidence in published, peer-reviewed medical literature listed below. When evaluating this literature, consider (among other things) the following:

- Whether the clinical characteristics of the patient and the cancer are adequately represented in the published evidence
- Whether the administered chemotherapy regimen is adequately represented in the published evidence
- Whether the reported study outcomes represent clinically meaningful outcomes experienced by patients
- Whether the study is appropriate to address the clinical question, consider:
  - Whether the experimental design, in light of the drugs and conditions under investigation, is appropriate to address the investigative question (for example, in some clinical studies, it may be unnecessary or not feasible to use randomization, double blind trials, placebos, or crossover)
Use peer-reviewed medical literature appearing in the regular editions of the following publications, not to include supplement editions privately funded by parties with a vested interest in the recommendations of the authors:

- American Journal of Medicine;
- Annals of Internal Medicine;
- Annals of Oncology;
- Annals of Surgical Oncology;
- Biology of Blood and Marrow Transplantation;
- Blood;
- Bone Marrow Transplantation;
- British Journal of Cancer;
- British Journal of Hematology;
- British Medical Journal;
- Cancer;
- Clinical Cancer Research;
- Drugs;
- European Journal of Cancer (formerly the European Journal of Cancer and Clinical Oncology);
- Gynecologic Oncology;
- International Journal of Radiation, Oncology, Biology, and Physics;
- The Journal of the American Medical Association;
- Journal of Clinical Oncology;
- Journal of the National Cancer Institute;
- Journal of the National Comprehensive Cancer Network (NCCN);
- Journal of Urology;
- Lancet;
- Lancet Oncology;
- Leukemia;
- The New England Journal of Medicine; or
- Radiation Oncology.

Notes:
- FDA approved drugs and biologicals may also be considered for use in the determination of medically accepted indications for off-label use if to be reasonable and necessary.
- If a use is identified as not indicated by the Centers for Medicare and Medicaid Services (CMS) or the FDA, or if a use is specifically identified as not indicated in one or more of the compendia listed, or it's determined, based on peer-reviewed medical literature, that a particular use of a drug is not safe and effective, the off-label usage is not supported and, therefore, the drug is not covered. (This criteria does not apply for the determination of drug eligibility for Part D.)

Refer to the Medicare Benefit Policy Manual, Chapter 15, §50.4.5 – Off-Label Use of Drugs and Biologicals in an Anti-Cancer Chemotherapeutic Regimen.
(Accessed September 26, 2022)

Examples of Not Reasonable and Necessary
Determinations as to whether medication is reasonable and necessary for an individual patient should be made on the same basis as all other such determinations (i.e., with the advice of medical consultants and with reference to accepted standards of medical practice and the medical circumstances of the individual case). The following guidelines identify three categories with specific examples of situations in which medications would not be reasonable and necessary according to accepted standards of medical practice:
Not for Particular Illness: Medications given for a purpose other than the treatment of a particular condition, illness, or injury are not covered (except for certain immunizations). Charges for medications, e.g., vitamins, given simply for the general good and welfare of the patient and not as accepted therapies for a particular illness are excluded from coverage.

Injection Method Not Indicated: Medication given by injection (parenterally) is not covered if standard medical practice indicates that the administration of the medication by mouth (orally) is effective and is an accepted or preferred method of administration. For example, the accepted standard of medical practice for the treatment of certain diseases is to initiate therapy with parenteral penicillin and to complete therapy with oral penicillin. UnitedHealthcare Medicare excludes the entire charge for penicillin injections given after the initiation of therapy if oral penicillin is indicated unless there are special medical circumstances that justify additional injections.

Excessive Medications: Medications administered for treatment of a disease and which exceed the frequency or duration of injections indicated by accepted standards of medical practice are not covered. For example, the accepted standard of medical practice in the maintenance treatment of pernicious anemia is one vitamin B-12 injection per month. UnitedHealthcare excludes the entire charge for injections given in excess of this frequency unless there are special medical circumstances that justify additional injections.

Notes:
- UnitedHealthcare will supplement the guidelines as necessary with guidelines concerning appropriate use of specific injections in other situations. They will use the guidelines to screen out questionable cases for special review, further development, or denial when the injection billed for would not be reasonable and necessary. They will coordinate any type of drug treatment review with the Quality Improvement Organization (QIO).
- If a medication is determined not to be reasonable and necessary for diagnosis or treatment of an illness or injury according to these guidelines, UnitedHealthcare excludes the entire charge (i.e., for both the drug and its administration). Also, UnitedHealthcare excludes from payment any charges for other services (such as office visits) which were primarily for the purpose of administering a non-covered injection (i.e., an injection that is not reasonable and necessary for the diagnosis or treatment of an illness or injury).

Refer to the Medical Benefit Policy Manual, Chapter 15, §50.4.3 – Examples of Not Reasonable and Necessary. (Accessed September 26, 2022)

Medicare Approved Clinical Trials: [Oxaliplatin (Eloxatin®), Irinotecan (Camptosar®), Cetuximab (Erbitux®), and Bevacizumab (Avastin®)]

Members may be eligible to participate in a Medicare approved clinical trial, including anti-cancer chemotherapy for colorectal cancer, when criteria are met.

Effective January 28, 2005, the off-label use of clinical items and services, including the use of the studied drugs oxaliplatin, irinotecan, cetuximab, or bevacizumab, are covered in specific clinical trials identified by the Centers for Medicare and Medicaid Services (CMS). The clinical trials identified by CMS for coverage of clinical items and services are sponsored by the National Cancer Institute (NCI) and study the use of one or more off-label uses of these four drugs in colorectal cancer and in other cancer types.

Refer to the NCD for Anti-Cancer Chemotherapy for Colorectal Cancer (110.17).

The list of Medicare approved clinical trials is available at https://www.cms.gov/Medicare/Medicare-General-Information/MedicareApprovedFacilities/index.html.

For payment rules for NCDs requiring CED, refer to the Coverage Summary titled Experimental Procedures and Items, Investigational Devices and Clinical Trials. (Accessed September 26, 2022)

Examples of Chemotherapy Services

Examples of chemotherapy services include, but are not limited to:

**Oral Anti-Cancer Drugs**

Oral anticancer drugs prescribed as anticancer chemotherapeutic agents are covered when all of the following criteria are met:

- Approved by the Food and Drug Administration (FDA)
- Prescribed by a physician or other practitioner licensed under state law to prescribe such drugs as anticancer chemotherapeutic agents
- Contains or is metabolized (prodrug) into the same active ingredients as a non-self-administrated anticancer chemotherapeutic drug or biological that is covered when furnished incident to a physician's service
- Has the same chemical/generic name as a non-self-administrable drug indicated by the FDA's approved drug products, Physician's Desk Reference (PDR), or an authoritative drug compendium
- Used for the same indications, including off-labeled uses, as the non-self-administrated version of the drug
- Considered reasonable and necessary for the individual member

Note: Members may have additional coverage for oral anti-cancer under the Part D Prescription Drug Plan, which are not covered in this coverage summary. Refer to the member's pharmacy booklet or contact the Prescription Solutions customer service department to determine coverage eligibility for prescription drug plan benefit.

For detailed coverage requirements, refer to the Medicare Benefit Policy Manual, Chapter 15, §50.5.3 Oral Anti-Cancer Drugs.

For claims payment and coding information, refer to the Medicare Claims Processing Manual, Chapter 17, §80.1 Oral Cancer Drugs.

Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. These LCDs/LCAs are available at https://www.cms.gov/medicare-coverage-database/new-search/search.aspx. (Accessed September 26, 2022)

Anti-Nausea (Anti-Emetic) Drugs

Oral anti-nausea (anti-emetic) drugs are covered when all of the following criteria are met:
- Approved by the FDA for use as anti-emetics
- Administered by the treating physician or in accordance with a written order from the physician as part of a cancer chemotherapeutic regimen
- Administered with a particular chemotherapy treatment and initiated within 2 hours of the administration of the chemotherapeutic agent and may be continued for a period not to exceed 48 hours from that time
- Used as a full therapeutic replacement for the intravenous anti-emetic drugs that would have otherwise been administered at the time of the chemotherapy treatment

Notes:
- Intravenous anti-emetics may be covered (subject to the rules of medical necessity) when furnished to the patients who fail on oral anti-emetics therapy.
- Members may have additional coverage for oral anti-emetic under the Part D Prescription Drug Plan, which are not covered in this Coverage Summary. Refer to the Member’s Pharmacy Booklet or contact the Prescription Solutions Customer Service Department to determine coverage eligibility for prescription drug plan benefit.

For detailed coverage requirements, refer to the Medicare Benefit Policy Manual, Chapter 15, §50.5.4 – Oral Anti-Nausea (Anti-Emetic) Drugs.

For claims payment and coding information, refer to the Medicare Claims Processing Manual, Chapter 17, §80.2 – Oral Anti-emetic Drugs Used as Full Replacement for Intravenous Anti-Emetic Drugs as Part of a Cancer Chemotherapeutic Regiment. (Accessed September 26, 2022)

Aprepitant

Aprepitant for chemotherapy-induced emesis is covered when Medicare criteria are met. For the list of approved agents and specific coverage information, refer to the NCD for Aprepitant for Chemotherapy-Induced Emesis (110.18). (Accessed September 26, 2022)
**Inpatient or Outpatient Oncology Services**

Inpatient or outpatient oncology services (which includes infusion clinic services) are covered. Refer to the UnitedHealthcare Commercial Utilization Review Guideline (URG) titled *Chemotherapy Observation and Inpatient Hospitalization*. Refer to the *Instruction for Use* within this URG document. URGs apply clinical guidelines to determine whether the health care services provided or planned for an individual member are the most appropriate and cost-effective services under the specific circumstances. (Accessed September 26, 2022)

**Scalp Hypothermia During Chemotherapy**

Scalp hypothermia during chemotherapy for prevention of hair loss (ice bag and cool bandages) may be used as supplies during chemotherapy but are not recognized for reimbursement. Refer to the *NCD for Scalp Hypothermia During Chemotherapy to Prevent Hair Loss (110.6)*. (Accessed September 26, 2022)

**Sipuleucel-T (PROVENGE®)**

**On-label Indication:**
- Effective for services performed on or after June 30, 2011, the Centers for Medicare and Medicaid Services (CMS) proposed that the evidence is adequate to conclude that the use of autologous cellular immunotherapy treatment - sipuleucel-T; PROVENGE® improves health outcomes for Medicare beneficiaries with for asymptomatic or minimally symptomatic metastatic castrate-resistant (hormone refractory) prostate cancer, and thus is reasonable and necessary for this on-label indication under 1862(a)(1)(A) of the Social Security Act. Medicare will allow a maximum of three (3) infusions per lifetime. Refer to the *NCD for Autologous Cellular Immunotherapy Treatment (110.22)*.
- Local Coverage Articles (LCAs) for sipuleucel-T (PROVENGE®) exist and compliance with these articles is required where applicable. These LCAs are available at [https://www.cms.gov/medicare-coverage-database/new-search/search.aspx](https://www.cms.gov/medicare-coverage-database/new-search/search.aspx).

**Off-label Indications:**
- Effective for services performed on or after June 30, 2011, coverage of all off-label uses of autologous cellular immunotherapy treatment – sipuleucel-T; PROVENGE® for the treatment of prostate cancer is left to the discretion of the local Medicare Administrative Contractors. Refer to the *NCD for Autologous Cellular Immunotherapy Treatment (110.22)*.
- Local Coverage Articles (LCAs) for sipuleucel-T (PROVENGE®) exist and compliance with these articles is required where applicable. These LCAs are available at [https://www.cms.gov/medicare-coverage-database/new-search/search.aspx](https://www.cms.gov/medicare-coverage-database/new-search/search.aspx).
- For states/territories with no LCDs/LCAs, refer to the *Chemotherapy, Immunotherapy, and Hormonal and Off-Label Use* guidelines in this coverage summary for Medicare guidelines for covered chemotherapy services and the use of compendia and evidence-based medical literature in determining coverage for this medication.

(Accessed September 26, 2022)

**Rituximab (Rituxan®)**

Refer to the Coverage Summary titled *Medications/Drugs (Outpatient/Part B)* for coverage guidelines.

**Erythropoietin**

Refer to the Coverage Summary titled *Medications/Drugs (Outpatient/Part B)* for coverage guidelines.

**Leucovorin**

Refer to the Coverage Summary titled *Medications/Drugs (Outpatient/Part B)* for coverage guidelines.

**Other Specific Chemotherapeutic Agents**

For coverage guideline for specific chemotherapeutic agents:
- If there are no applicable LCDs/LCAs found, refer to the *Chemotherapy, Immunotherapy, and Hormonal* and *Off-Label Use* guidelines in this Coverage Summary for Medicare guidelines for covered chemotherapy services and the use of compendia and evidence-based medical literature in determining coverage for specific medication.

Instructions for Use

This information is being distributed to you for personal reference. The information belongs to UnitedHealthcare and unauthorized copying, use, and distribution are prohibited. This information is intended to serve only as a general reference resource and is not intended to address every aspect of a clinical situation. Physicians and patients should not rely on this information in making health care decisions. Physicians and patients must exercise their independent clinical discretion and judgment in determining care. Each benefit plan contains its own specific provisions for coverage, limitations, and exclusions as stated in the Member’s Evidence of Coverage (EOC)/Summary of Benefits (SB). If there is a discrepancy between this policy and the member’s EOC/SB, the member’s EOC/SB provision will govern. The information contained in this document is believed to be current as of the date noted.

The benefit information in this Coverage Summary is based on existing national coverage policy; however, Local Coverage Determinations (LCDs) may exist and compliance with these policies are required where applicable.

There are instances where this document may direct readers to a UnitedHealthcare Commercial Medical Policy, Medical Benefit Drug Policy, and/or Coverage Determination Guideline (CDG). In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence ([Medicare IOM Pub. No. 100-16, Ch. 4, §90.5](https://www.cms.gov)).
