Coverage Summary

Impotence Treatment

Policy Number: I-004  Products: UnitedHealthcare Medicare Advantage Plans  Original Approval Date: 07/16/2008
Approved by: UnitedHealthcare Medicare Benefit Interpretation Committee  Last Review Date: 08/20/2019

Related Medicare Advantage Policy Guidelines:

- Cavernous Nerves by Electrical Stimulation with Penile Plethysmography (NCD 160.26)
- Diagnosis and Treatment of Impotence (NCD 230.4)
- Testosterone Replacement Therapy

This information is being distributed to you for personal reference. The information belongs to UnitedHealthcare and unauthorized copying, use, and distribution are prohibited. This information is intended to serve only as a general reference resource and is not intended to address every aspect of a clinical situation. Physicians and patients should not rely on this information in making health care decisions. Physicians and patients must exercise their independent clinical discretion and judgment in determining care. Each benefit plan contains its own specific provisions for coverage, limitations, and exclusions as stated in the Member’s Evidence of Coverage (EOC)/Summary of Benefits (SB). If there is a discrepancy between this policy and the member’s EOC/SB, the member’s EOC/SB provision will govern. The information contained in this document is believed to be current as of the date noted.

The benefit information in this Coverage Summary is based on existing national coverage policy, however, Local Coverage Determinations (LCDs) may exist and compliance with these policies are required where applicable.

There are instances where this document may direct readers to a UnitedHealthcare Commercial Medical Policy, Medical Benefit Drug Policy, and/or Coverage Determination Guideline (CDG). In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence (Medicare IOM Pub. No. 100-16, Ch. 4, §90.5).

INDEX TO COVERAGE SUMMARY

I. COVERAGE
   1. Diagnosis and Treatment of Sexual Impotency
   2. Vacuum Erection Devices (VED) or Constriction Rings
   3. Electrical stimulation of the cavernous and associated parasympathetic nerves with penile plethysmography
   4. Prescription or injectable medications
   5. Elective or voluntary procedures
   6. Nerve Graft to Restore Erectile Function During Radical Prostatectomy

IV. REVISION HISTORY

I. COVERAGE

Coverage Statement: The treatment of impotency is covered when Medicare criteria are met.

Guidelines/Notes:

1. Diagnosis and treatment of sexual impotency may be covered. Depending on the cause of the condition, treatment may be:
a. Non-surgical treatment (e.g., medical or psychotherapeutic treatment); see the Coverage Summary for Mental Health Services and Procedures.

b. Surgical treatment (e.g., implantation of penile prosthesis)

Notes:
- Since causes, and therefore, appropriate treatment varies, if abuse is suspected it may be necessary to request documentation of appropriateness in individual cases. Documentation of a history or radical prostatectomy would be an indication for treatment.
- See the NCD for Diagnosis and Treatment of Impotence (230.4). (Accessed December 20, 2019)

2. External Vacuum Erection Devices (VED) (L7900) or Constriction Rings (L7902) (e.g., ErecAid)

For dates of service on or after July 1, 2015, vacuum erection devices and related accessories are statutorily non-covered based on the Achieving a Better Life Experience (ABLE) Act of 2014. See the DME MAC LCD for Vacuum Erection Devices (L34824). (Accessed February 17, 2020)

3. Electrical stimulation of the cavernous and associated parasympathetic nerves with penile plethysmography is not covered for members undergoing nerve-sparing prostatic or colorectal surgical procedures. See the NCD for Cavernous Nerves by Electrical Stimulation with Penile Plethysmography (160.26). (Accessed July 29, 2019)

4. Prescription or injectable medications for the treatment of sexual or erectile dysfunction are not covered. ED drugs will meet the definition of a Part D drug when prescribed for medically-accepted indications approved by the FDA other than sexual or erectile dysfunction (such as pulmonary hypertension). However, ED drugs will not meet the definition of a Part D drug when used off-label, even when the off-label use is listed in one of the compendia found in section 1927(g)(1)(B)(i) of the Act: American Hospital Formulary Service Drug Information, United States Pharmacopeia-Drug Information (or its successor publications), and DRUGDEX Information System.

Also see the Coverage Summary for Medications/Drugs (Outpatient/Part B).

5. Elective or voluntary procedures, services, supplies and medications for the enhancement of sexual performance are not covered except as covered in #1 above.

Also see the Medicare Prescription Drug Benefit Manual, Chapter 6, Section 20.1 - Excluded Categories. (Accessed December 20, 2019)

6. Nerve Graft to Restore Erectile Function During Radical Prostatectomy

- Medicare does not have a National Coverage Determination (NCD) nerve graft to restore erectile function during radical prostatectomy.
II. DEFINITIONS

None
