## Coverage Summary

### Spine Procedures

**Policy Number:** S-005  
**Products:** UnitedHealthcare Medicare Advantage Plans  
**Original Approval Date:** 05/22/2008  
**Approved by:** UnitedHealthcare Medicare Benefit Interpretation Committee  
**Last Review Date:** 11/17/2020

**Related Medicare Advantage Policy Guidelines:**
- Category III CPT Codes
- Percutaneous Image-Guided Lumbar Decompression for Lumbar Spinal Stenosis (NCD 150.13)
- Percutaneous Minimally Invasive Fusion
- Thermal Intradiscal Procedures (TIPs) (NCD 150.11)
- Vertebral Augmentation Procedure (VAP)/Percutaneous Vertebroplasty

---

*This information is being distributed to you for personal reference. The information belongs to UnitedHealthcare and unauthorized copying, use, and distribution are prohibited. This information is intended to serve only as a general reference resource and is not intended to address every aspect of a clinical situation. Physicians and patients should not rely on this information in making health care decisions. Each benefit plan contains its own specific provisions for coverage, limitations, and exclusions as stated in the member’s Evidence of Coverage (EOC)/Summary of Benefits (SB). If there is a discrepancy between this policy and the member’s EOC/SB, the member’s EOC/SB provision will govern. The information contained in this document is believed to be current as of the date noted.*

*The benefit information in this Coverage Summary is based on existing national coverage policy, however, Local Coverage Determinations (LCDs) may exist and compliance with these policies are required where applicable.*

*There are instances where this document may direct readers to a UnitedHealthcare Commercial Medical Policy, Medical Benefit Drug Policy, and/or Coverage Determination Guideline (CDG). In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence (Medicare IOM Pub. No. 100-16, Ch. 4, §90.5).*

### I. COVERAGE

**Coverage Statement:** Spine procedures may be covered when Medicare criteria are met.

**Guidelines/Notes:**

1. **Lumbar Spinal Fusion**
   - *Medicare does not have a National Coverage Determination (NCD) for lumbar spinal fusion.*
   - *Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. For specific LCDs/LCAs, refer to the LCD/LCA Availability Grid (Attachment B).*
   - *For coverage guidelines for states/territories with no LCDs/LCAs, see the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After checking the LCD/LCA Availability Grid and searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)*
   - *Committee approval date: November 17, 2020*
   - *Accessed January 15, 2021*

   *When coflex-F® Implant System is used as part of spinal fusion, see Guideline 4.b [Interlaminar Lumbar Instrumented Fusion (ILIF)].*

2. **Cervical Spinal Fusion**
   - *Medicare does not have a National Coverage Determination (NCD) for cervical spinal fusion.*
   - *Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist at this time.*
   - *For coverage guidelines, refer to the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)*
   - *Committee approval date: November 17, 2020*
   - *Accessed November 10, 2020*

   *For lumbar spinal fusion, refer to Guidelines #1 above.*

3. **Thermal Intradiscal Procedures (TIPs)**
   Effective for services performed on or after September 29, 2008, the CMS has determined that Percutaneous thermal intradiscal procedures (TIPs) are not reasonable and necessary for the treatment of low back pain. Therefore, TIPs, which include procedures that employ the use of a radiofrequency energy source or electrothermal energy to apply or create heat and/or disruption...
within the disc for the treatment of low back pain, are non-covered.

**Note:** Although not intended to be an all inclusive list, TIPs are commonly identified as intradiscal electrothermal therapy (IDET), intradiscal thermal annuloplasty (IDTA), percutaneous intradiscal radiofrequency thermocoagulation (PIRFT), radiofrequency annuloplasty (RA), intradiscal biacuplasty (IDB), percutaneous (or plasma) disc decompression (PDD) or coblation, or targeted disc decompression (TDD). At times, TIPs are identified or labeled based on the name of the catheter/probe that is used (e.g., SpineCath, discTRODE, SpineWand, Accutherm, or TransDiscal electrodes). Each technique or device has its own protocol for application of the therapy. Percutaneous disc decompression or nucleoplasty procedures that do not utilize a radiofrequency energy source or electrothermal energy (such as the disc decompressor procedure or laser procedure) are not within the scope of this policy. See the **NCD for Thermal Intradiscal Procedures (TIPs) (150.11)**. (Accessed November 10, 2020)

4. **Spinal Decompression and Interspinous Process Decompression Systems**
   
a. **Interspinous Process Decompression (IPD®) [X STOP® and coflex® Interlaminar Technology (CPT codes 22867, 22868, 22869 and 22870)]**  
   **(Note:** May also see IPD requested inappropriately as spinal fixation; CPT codes 22842, 22843, 22844, and 22849)
   - Medicare does not have a National Coverage Determination (NCD) for interspinous process decompression system such as X STOP® and coflex® Interlaminar Technology.  
   - Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist at this time.
   - **For coverage guidelines,** see the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)
   - **Committee approval date:** November 17, 2020
   - Accessed November 10, 2020

**X STOP® Interspinous Process Decompression System ("X STOP"):** A titanium implant that fits between the spinous processes of the lower (lumbar) spine. It is made from titanium alloy and consists of two components: a spacer assembly and a wing assembly. 

**Coflex® Interlaminar Technology:** A U-shaped, titanium alloy implant that fits between two bones called the spinous processes located in the lower back (lumbar region) of the spine. The device is placed between two adjacent lower back bones after surgical relief of pressure on the spinal cord and nerves (decompression) to ease the pain associated with lumbar spinal stenosis, a narrowing of the passages for the spinal cord and nerves. 

b. **Interlaminar Lumbar Instrumented Fusion (ILIF), e.g., coflex-® Implant System**  
   **(Note:** May see billed as spinal fixation/instrumentation during spinal fusion; CPT codes 22842, 22843, 22844 and 22849)
• Medicare does not have a National Coverage Determination (NCD) for interlaminar lumbar instrumented fusion (ILIF), e.g., Coflex-F® Implant System (see description below)
• Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist at this time.
• For coverage guidelines, refer to the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)
• Committee approval date: November 17, 2020
• Accessed November 10, 2020

Coflex-F® Implant System: A spinous process fixation device that stabilizes the spinous processes and spine to act as an adjunct to fusion. It consists of a single, U-shaped component, fabricated from medical grade titanium alloy (Ti6Al4V). A set of two wings extends vertically from the superior long arm of the device, with a second set of wings extending below the inferior long arm. A screw and sleeve are inserted through a prepared hole and fixes the crimped wings to the superior and inferior spinous processes.

5. Arthrodesis, Pre-sacral Interbody Technique (CPT code 22586)
• Medicare does not have a National Coverage Determination (NCD).
• Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist.
• For coverage guidelines, see the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)
• Committee approval date: November 17, 2020
• Accessed November 10, 2020

6. Total Facet Joint Arthroplasty, Facetectomy and Stand-Alone Facet Fusion without an Accompanying Decompressive Procedure (CPT codes 0219T, 0220T, 0221T and 0222T)
• Medicare does not have a National Coverage Determination (NCD) for total facet joint arthroplasty, facetectomy and stand-alone facet fusion without an accompanying decompressive procedure.
• Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist.
• For coverage guidelines, see the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)
• Committee approval date: November 17, 2020
• Accessed November 10, 2020

7. Decompression Procedure, Percutaneous, of Nucleus Pulposus (CPT code 62287)
• Medicare does not have a National Coverage Determination (NCD) for decompression procedure, percutaneous, of nucleus pulposus.
• Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist.
• For coverage guidelines, see the UnitedHealthcare Commercial Medical Policy for Discogenic Pain Treatment. (IMPORTANT NOTE: After searching the Medicare
8. **Percutaneous Image-guided Lumbar Decompression (PILD) [Includes Minimally Invasive Lumbar Decompression (mild®)]**

PILD is a posterior decompression of the lumbar spine performed under indirect image guidance without any direct visualization of the surgical area. This is a procedure proposed as a treatment for symptomatic Lumbar Spinal Stenosis (LSS) unresponsive to conservative therapy. This procedure is generally described as a non-invasive procedure using specially designed instruments to percutaneously remove a portion of the lamina and debulk the ligamentum flavum. The procedure is performed under x-ray guidance (e.g., fluoroscopic, CT) with the assistance of contrast media to identify and monitor the compressed area via epidurogram.

**Covered Indications:**

Effective for services performed on or after January 9, 2014, the Centers for Medicare & Medicaid Services (CMS) has determined that PILD will be covered by Medicare when provided in a clinical study under section 1862(a)(1)(E) through Coverage with Evidence Development (CED) for beneficiaries with LSS who are enrolled in an approved clinical study that meets the criteria outlined in the NCD.

**Non-Covered Indications:**

Effective for services performed on or after January 9, 2014, CMS has determined that PILD for LSS may only be covered under the context of a clinical trial as described in the above section according to section 1862(a)(1)(E) of the Social Security Act. CMS has determined that PILD for LSS is not reasonable and necessary under section 1862(a)(1)(A) of the Act. (additional language added to align with NCD)

See the [NCD for Percutaneous Image-Guided Lumbar Decompression for Lumbar Spinal Stenosis (150.13)]. (Accessed November 12, 2020)

Also see the [Coverage Summary for Experimental Procedures and Items, Investigational Devices and Clinical Trials](#).

9. **Percutaneous Vertebroplasty and Percutaneous Vertebral Augmentation (Also Known as Balloon-Assisted Percutaneous Vertebroplasty, Kyphoplasty) (CPT codes 22510, 22511, 22512, 22513, 22514 and 22515)**

- Medicare does not have a National Coverage Determination (NCD) for percutaneous vertebroplasty and percutaneous vertebral augmentation.
- Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist for all states/territories and compliance with these policies is required where applicable. For specific LCDs/LCAs, refer to the [LCD/LCA Availability Grid (Attachment A)](#).
- **Committee approval date: November 17, 2020**
- Accessed January 15, 2021

10. **Percutaneous Sacral Augmentation (Sacroplasty) (CPT codes 0200T and 0201T)**

- Medicare does not have a National Coverage Determination (NCD) for sacroplasty.
- Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) do not exist.
For coverage guidelines, see the UnitedHealthcare Commercial Medical Policy for Surgical Treatment for Spine Pain. (IMPORTANT NOTE: After searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)

Committee approval date: November 17, 2020

Accessed November 10, 2020

11. Stereotactic Computer Assisted Volumetric and/or Navigational Procedure; see the Coverage Summary for Radiologic Therapeutic Procedures.

12. Percutaneous Minimally Invasive Fusion/Stabilization of the Sacroiliac Joint for the Treatment of Back Pain (CPT code 27279)
   - Medicare does not have a National Coverage Determination (NCD) for percutaneous minimally invasive fusion/stabilization of the sacroiliac joint for the treatment of back pain.
   - Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) exist and compliance with these policies is required where applicable. For specific LCDs/LCAs, refer to the LCD/LCA Availability Grid (Attachment C).
   - For coverage guidelines for states/territories with no LCDs/LCAs, see the Wisconsin Physicians Service Insurance Corp. LCD/LCA for Percutaneous Minimally Invasive Fusion/Stabilization of the Sacroiliac Joint for the Treatment of Back Pain (L36000). (IMPORTANT NOTE: After checking the LCD/LCA Availability Grid and searching the Medicare Coverage Database, if no LCD/LCA is found, then use the above referenced policy.)
   - Committee approval date: November 17, 2020
   - Accessed January 15, 2021

II. DEFINITIONS

III. REFERENCES

IV. REVISION HISTORY

11/17/2020
- Reorganized coverage guidelines
- Related Medicare Advantage Policy Guidelines
  - Added reference link to the policy titled Category III CPT Codes
  - Removed reference link to the policy titled Epidural Injection (retired)
- Guideline 5 [Arthrodesis, Pre-sacral Interbody Technique (CPT code 22586)]
  - Revised language pertaining to Local Coverage Determinations (LCDs)/Local Coverage Articles (LCAs) to indicate LCDs/LCAs do not exist at this time
- Guideline 6 [Total Facet Joint Arthroplasty, Facetectomy and Stand-Alone Facet Fusion without an Accompanying Decompressive Procedure (CPT codes 0219T, 0220T, 0221T and 0222T)]
  - Changed guideline title; previously titled Spinal Stabilization (CPT codes 0200T-0202T, 0219T, and 0222)
  - Updated list of applicable CPT codes; removed 0200T, 0201T, and 0202T (refer to Guideline 10)
  - Updated language to clarify Medicare does not have a National Coverage
Determination (NCD) for total facet joint arthroplasty, facetectomy and stand-alone facet fusion without an accompanying decompressive procedure

Guideline 8 (Non-Covered Indications)
- Added language to indicate CMS has determined that Percutaneous Image-Guided Lumbar Decompression (PILD) for Lumbar Spinal Stenosis (LSS) may only be covered under the context of a clinical trial as described [in the policy] according to Section 1862(a)(1)(E) of the Social Security Act (the Act)

Guideline 9 [Percutaneous Vertebroplasty and Percutaneous Vertebral Augmentation (also known as balloon-assisted percutaneous vertebroplasty, kyphoplasty) (CPT codes 22510, 22511, 22512, 22513, 22514, and 22515)]
- Updated list of applicable CPT codes:
  - Added 22511, 22512, 22513, and 22514
  - Removed 0200T and 0201T (refer to Guideline 10)

Guideline 10 [Percutaneous Sacral Augmentation (Sacroplasty) (CPT codes 0200T and 0201T)] (new to policy)
- Added coverage guidelines to indicate:
  - Medicare does not have a National Coverage Determination (NCD) for Sacroplasty
  - LCDs/LCAs do not exist at this time
  - For coverage guidelines, refer to the UnitedHealthcare Commercial Medical Policy titled Surgical Treatment for Spine Pain

Guideline 12 [Percutaneous Minimally Invasive Fusion /Stabilization of the Sacroiliac Joint for the Treatment of Back Pain (CPT code 27279)]
- Changed guideline title; previously titled Percutaneous Minimally Invasive Fusion (CPT code 27279)
- Updated language to clarify Medicare does not have a NCD for Percutaneous Minimally Invasive Fusion/Stabilization of the Sacroiliac Joint for the Treatment of Back Pain

Attachments
- Updated LCD/LCA Availability Grids to reflect the most current reference links
- Removed LCD/LCA Availability Grid for Arthrodesis, Pre-sacral Interbody Technique
