## Policy Summary

[↪ See Purpose](#)

### Overview

It has been determined that the Sykes hernia control (a spring-type, U-shaped, strapless truss) is not functionally more beneficial than a conventional truss.

### Guidelines

Reimbursement can be given for this device only when an ordinary truss would be covered. Like all trusses, it is only of benefit when dealing with a reducible hernia. When a charge for this item is substantially in excess of that which would be reasonable for a conventional truss used for the same condition, base reimbursement on the reasonable charges for the conventional truss.

## Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this guideline does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

HCPCS Code	Description
L8499	Unlisted procedure for miscellaneous prosthetic services

## Definitions
