Overview

Percutaneous Vertebral Augmentation

Percutaneous vertebral augmentation (PVA) is a minimally invasive procedure for the treatment of compression fractures of the vertebral body. The procedure includes a cavity creation which results in fracture reduction along with an attempt to restore vertebral body height and alignment. Using image guidance x-rays, incisions are made and a probe is placed into the vertebral space in the location of the fracture. The collapsed vertebral body is drilled and a device which displaces, removes or compacts the compressed area of the vertebrae is used to create a cavity prior to injection of bone filler (polymethylmethacrylate) (PMMA).

Percutaneous Vertebroplasty

Percutaneous vertebroplasty (PVP) is a therapeutic, interventional neurosurgical and radiological procedure that consists of the percutaneous injection of a biomaterial, methyl methacrylate, into a lesion of a thoracic or lumbar vertebral body. The procedure is utilized for pain relief and bone strengthening of weakened vertebral bodies.

The procedure is performed under fluoroscopic guidance, although some prefer the use of computed tomography (CT) with fluoroscopy for needle positioning and injection assessment. An intraosseous venogram is sometimes performed before cement injection to determine whether the needle is positioned within a direct venous anastomosis to the central or epidural veins, to minimize extravasation into venous structures. Conscious sedation with additional local anesthesia (1% lidocaine) is generally utilized; however, patients who experience difficulties with ventilation or are unable to tolerate prone position during the procedure may require general anesthesia or deep sedation with airway and ventilation support. The methyl methacrylate is injected into the vertebral body until resistance is met or until cement reaches the posterior wall.

Guidelines

PVA (percutaneous vertebroplasty (PVP) or kyphoplasty (PKP)) is covered for Osteoporotic Vertebral Compression Fracture (VCF) in patients with both the following:
Inclusion criteria (all are required):
- Acute (< 6 weeks) or subacute (6-12 weeks) osteoporotic VCF (T1 – L5) based on symptom onset, and documented by advanced imaging (bone marrow edema on MRI or bone-scan/SPECT/CT uptake)
- Symptomatic (one):
  - Hospitalized with severe pain (Numeric Rating Scale (NRS) or Visual Analog Scale (VAS) pain score ≥ 8)
  - Non-hospitalized with moderate to severe pain (NRS or VAS ≥ 5) despite optimal non-surgical management (NSM) (one):
    - Stable to improved pain (but NRS or VAS still ≥ 5) (with ≥ 2 of the following):
      - Progression of vertebral body height loss
      - > 25% vertebral body height reduction
      - Kyphotic deformity
      - Severe impact of VCF on daily functioning (Roland Morris Disability Questionnaire (RDQ) > 17)
- Continuum of care (both)
  - All patients presenting with VCF should be referred for evaluation of bone mineral density (BMD) and osteoporosis education for subsequent treatment as indicated.
  - All patients with VCF should be instructed to take part in an osteoporosis prevention/treatment program.

Exclusion criteria:
- Absolute contraindication
  - Current back pain is not primarily due to the identified acute VCF(s).
  - Osteomyelitis, discitis or active systemic infection
  - Pregnancy
- Relative contraindication
  - Greater than three vertebral fractures per procedure
  - Allergy to bone cement or opacification agents
  - Uncorrected Coagulopathy
  - Spinal instability
  - Myelopathy from the fracture
  - Neurologic deficit
  - Neural impingement
  - Fracture retropulsion/canal compromise

Note: See Local Coverage Determination (LCD) References for coverage details. Coverage for Malignant Vertebral Fractures and Traumatic Compression Fractures varies by LCD.

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this guideline does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

Revisions to this summary document do not in any way modify the requirement that services be provided and documented in accordance with the Medicare guidelines in effect on the date of service in question.
Date | Summary of Changes
--- | ---
 | “Acute [at least an acute component (e.g., acute on chronic)] (< 6 weeks) osteoporotic VCF (T5–L5) by recent (within 30 days) advanced imaging (bone marrow edema on MRI or bone-scan/SPECT/CT uptake)” with “acute (< 6 weeks) or subacute (6-12 weeks) osteoporotic VCF (T1–L5) based on symptom onset, and documented by advanced imaging (bone marrow edema on MRI or bone-scan/SPECT/CT uptake)”
 | “Non-hospitalized with severe pain (NRS or VAS ≥ 5 despite optimal non-surgical management (NSM) (consider including pedicle periosteal infiltration)” with “non-hospitalized with severe pain (NRS or VAS ≥ 5 despite optimal non-surgical management (NSM)”
 | Revised exclusion criteria for PVA [PVP or PKP] for VCF:
 | Absolute contraindication:
 | Removed criterion excluding greater than three vertebral fractures
 | Relative contraindication:
 | Added criterion excluding greater than three vertebral fractures per procedure
 | Replaced criterion excluding “coagulopathy” with “uncorrected coagulopathy”
 | Added notation to indicate coverage for malignant vertebral fractures and traumatic compression fractures varies by Local Coverage Determination (LCD)

**Supporting Information**
- Updated References section to reflect the most current information
- Archived previous policy version MPG345.06

**Purpose**

The Medicare Advantage Policy Guideline documents are generally used to support UnitedHealthcare Medicare Advantage claims processing activities and facilitate providers’ submission of accurate claims for the specified services. The document can be used as a guide to help determine applicable:
- Medicare coding or billing requirements, and/or
- Medical necessity coverage guidelines; including documentation requirements.

UnitedHealthcare follows Medicare guidelines such as NCDs, LCDs, LCAs, and other Medicare manuals for the purposes of determining coverage. It is expected providers retain or have access to appropriate documentation when requested to support coverage. Please utilize the links in the References section below to view the Medicare source materials used to develop this resource document. This document is not a replacement for the Medicare source materials that outline Medicare coverage requirements. Where there is a conflict between this document and Medicare source materials, the Medicare source materials will apply.

**Terms and Conditions**

The Medicare Advantage Policy Guidelines are applicable to UnitedHealthcare Medicare Advantage Plans offered by UnitedHealthcare and its affiliates.

These Policy Guidelines are provided for informational purposes, and do not constitute medical advice. Treating physicians and healthcare providers are solely responsible for determining what care to provide to their patients. Members should always consult their physician before making any decisions about medical care.

Benefit coverage for health services is determined by the member specific benefit plan document* and applicable laws that may require coverage for a specific service. The member specific benefit plan document identifies which services are covered, which are excluded, and which are subject to limitations. In the event of a conflict, the member specific benefit plan document supersedes the Medicare Advantage Policy Guidelines.

Medicare Advantage Policy Guidelines are developed as needed, are regularly reviewed and updated, and are subject to change. They represent a portion of the resources used to support UnitedHealthcare coverage decision making. UnitedHealthcare may modify these Policy Guidelines at any time by publishing a new version of the policy on this website.
