

Drug Testing Policy, Professional

IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY

This policy is applicable to UnitedHealthcare Medicare Advantage Plans offered by UnitedHealthcare and its affiliates.

You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare Medicare Advantage reimbursement policies use Current Procedural Terminology (CPT®*), Centers for Medicare and Medicaid Services (CMS), or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.

This reimbursement policy applies to all health care services billed on CMS 1500 forms. Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design and other factors are considered in developing reimbursement policy.

This information is intended to serve only as a general resource regarding UnitedHealthcare's Medicare Advantage reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare Medicare Advantage may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare Medicare Advantage enrollees. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to: legislative mandates, the physician or other provider contracts, and/or the enrollee's benefit coverage documents**. Finally, this policy may not be implemented exactly the same way on the different electronic claims processing systems used by UnitedHealthcare Medicare Advantage due to programming or other constraints; however, UnitedHealthcare Medicare Advantage strives to minimize these variations.

UnitedHealthcare Medicare Advantage may modify this reimbursement policy at any time to comply with changes in CMS policy and other national standard coding guidelines by publishing a new version of the reimbursement policy on this website. However, the information presented in this reimbursement policy is accurate and current as of the date of publication. UnitedHealthcare Medicare Advantage encourages physicians and other health care professionals to keep current with any CMS policy changes and/or billing requirements by referring to the CMS or your local carrier website regularly. Physicians and other health care professionals can sign up for regular distributions for policy or regulatory changes directly from CMS and/or your local carrier. UnitedHealthcare's Medicare Advantage reimbursement policies do not include notations regarding prior authorization requirements.

Application

This reimbursement policy applies to services reported using the 1500 Health Insurance Claim Form (a/k/a CMS 1500) or its electronic equivalent or its successor form. This policy applies to all products and all network and non-network physicians and other qualified health care professionals, including, but not limited to, non-network authorized and percent of charge contract physicians and other qualified health care professionals.

Policy

Overview

This policy defines the daily limit for presumptive and definitive drug testing and addresses Specimen Validity Testing.

All services described in this policy may be subject to additional UnitedHealthcare Medicare Advantage reimbursement policies including, but not limited to, the Maximum Frequency Per Day Policy, Laboratory Services Policy, and CCI Editing Policy.

Reimbursement Guidelines

This policy enforces the code description for presumptive and definitive drug testing in that the service should be reported once per day and it includes specimen validity testing.

Clinical drug testing is used in pain management and in substance abuse screening and treatment programs. The testing may be used to detect prescribed, therapeutic drugs, prescription drugs of abuse, illicit drugs, and/or other substances such as nicotine.

Presumptive drug testing, also known as drug screening, is used when necessary to determine the presence or absence of drugs or a Drug Class. Results are expressed as negative or positive. The methodology is considered when coding presumptive procedures. Per CPT guidelines each presumptive drug testing code represents all drug and Drug Class tests performed by the respective methodology per date of service. The test is a single per patient service that should only be reported once irrespective of the number of Drug Class procedures or results on any date of service.

Definitive drug testing, also known as confirmation testing, is used when it is necessary to identify specific medications, illicit substances and metabolites. Definitive urine drug test (UDT) reports the results of drugs absent or present in concentrations of ng/ml. Definitive drug testing is qualitative or quantitative to identify possible use or non-use of a drug. These tests identify specific drugs and associated metabolites. A presumptive drug test is not required to be provided prior to a definitive drug test. Consistent with CMS, definitive drug testing CPT codes 80320-80377 are considered non-reimbursable and the appropriate HCPCS G0480-G0483 or G0659 should be reported. The HCPCS codes describe a per day service that represents the total number of different Drug Classes performed. When applicable, Proprietary Laboratory Analysis CPT codes may be reported and are considered under the policy guidelines pertaining to definitive drug testing.

Some examples of drugs or a Drug Class that are commonly assayed by presumptive tests, followed by definitive testing are: alcohols, amphetamines, barbiturates/sedatives, benzodiazepines, cocaine and metabolites, methadone, antihistamines, stimulants, opioid analgesics, salicylates, cardiovascular drugs, antipsychotics, and cyclic antidepressants.

In accordance with the code descriptions and the CPT and CMS guidelines, will only allow one drug test within the presumptive Drug Class and one drug test within the definitive Drug Class per date of service by the same or different provider.

Specimen Validity Testing to assure that a specimen has not been compromised or that a test has not been adulterated may be required. However, Specimen Validity Testing is included in the presumptive and definitive drug testing CPT and HCPCS code descriptions and is considered a quality control which is an integral part of the collection process and is not separately reimbursable. UnitedHealthcare Medicare Advantage will deny Specimen Validity Testing when performed on the same date of service as a presumptive and/or definitive drug test by the same or different provider. A modifier may be appropriate when a service commonly used for Specimen Validity Testing is performed distinctly separate from the drug test service and the documentation supports the service was not related to the drug testing.

Definitions	
Drug Class	A group of drugs that have the same chemical structure, work in the same way and/or are used for the same purpose.
Proprietary Laboratory Analysis	Describe proprietary clinical laboratory analysis and can be provided either by a single (“sole-source”) laboratory or licensed or marketed to multiple providing laboratories (eg, cleared or approved by the Food and Drug Administration [FDA]). These codes include advanced diagnostic laboratory tests (ADLTs) and clinical diagnostic laboratory tests (CDLTs) as defined under the Protecting Access to Medicare Act (PAMA) of 2014.
Specimen Validity Testing	Generally pertains to urine specimen testing to ensure that the sample has not been adulterated or substituted. It may be applicable to other types of specimens.

Questions and Answers	
1	<p>Q: Will UnitedHealthcare Medicare Advantage reimburse more than one presumptive and/or one definitive drug test on the same date of service if a modifier is appended?</p> <p>A: No, each of the presumptive and definitive drug codes define a single manual or automated laboratory service that is reported once per day, per patient, irrespective of the number of Drug Classes, sample validations, or Specimen Validity Tests performed related to that service on any date of service. In accordance with the CPT and CMS guidelines UnitedHealthcare Medicare Advantage will not reimburse more than one presumptive and/or one definitive drug test per day regardless of the number of billing providers.</p>
2	<p>Q: Will UnitedHealthcare Medicare Advantage consider separate reimbursement for laboratory service (Ex: urinalysis for urinary tract infection) performed on the same day as a drug screening test?</p> <p>A: Yes, UnitedHealthcare Medicare Advantage will consider separate reimbursement of laboratory services that are appended with an appropriate modifier to identify the test was distinctly separate and not related to drug testing as a Specimen Validity Test. The records must also support that the laboratory service performed was not for Specimen Validity Testing and the modifier was appropriately reported. Please refer to the Modifier Reference Policy for additional modifier information.</p>
3	<p>Q: What is the difference between Presumptive and Definitive testing?</p> <p>A: A presumptive test is one used to identify possible use or non-use of a drug or Drug Class. Presumptive tests are not definitive. They only screen for the presence of a compound. A definitive or confirmation test is one that uses instrument analysis to positively identify the presence or quantity of a drug.</p>
