Medically Unlikely Edits Policy, Professional

**IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY**

This policy is applicable to UnitedHealthcare Medicare Advantage Plans offered by UnitedHealthcare and its affiliates.

You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare Medicare Advantage reimbursement policies use Current Procedural Terminology (CPT®*), Centers for Medicare and Medicaid Services (CMS), or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.

This reimbursement policy applies to all health care services billed on CMS 1500 forms and, when specified, to those billed on UB04 forms (CMS 1450). Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design and other factors are considered in developing reimbursement policy.

This information is intended to serve only as a general resource regarding UnitedHealthcare's Medicare Advantage reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare Medicare Advantage may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare Medicare Advantage enrollees. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to: legislative mandates, the physician or other provider contracts, and/or the enrollee’s benefit coverage documents**. Finally, this policy may not be implemented exactly the same way on the different electronic claims processing systems used by UnitedHealthcare Medicare Advantage due to programming or other constraints; however, UnitedHealthcare Medicare Advantage strives to minimize these variations.

UnitedHealthcare Medicare Advantage may modify this reimbursement policy at any time to comply with changes in CMS policy and other national standard coding guidelines by publishing a new version of the reimbursement policy on this website. However, the information presented in this reimbursement policy is accurate and current as of the date of publication. UnitedHealthcare Medicare Advantage encourages physicians and other health care professionals to keep current with any CMS policy changes and/or billing requirements by referring to the CMS or your local carrier website regularly. Physicians and other health care professionals can sign up for regular distributions for policy or regulatory changes directly from CMS and/or your local carrier. UnitedHealthcare's Medicare Advantage reimbursement policies do not include notations regarding prior authorization requirements.

** For more information on a specific enrollee's benefit coverage, please call the customer service number on the back of the member ID card.

**Application**

This reimbursement policy applies to services reported using the 1500 Health Insurance Claim Form (a/k/a CMS-1500) or its electronic equivalent or its successor form. This policy applies to all products and all network and non-network physicians and other qualified health care professionals, including, but not limited to, non-network authorized and percent of charge contract physicians and other qualified health care professionals.

**Policy**

**Overview**

The Centers for Medicare and Medicaid Services (CMS) developed the Medically Unlikely Edits (MUE) program to reduce the paid claims error rate for Part B claims. An MUE for a HCPCS/CPT code is the maximum units of service that a
provider would report under most circumstances for a single beneficiary on a single date of service. The first edits were implemented January 1, 2007 and even today not all HCPCS/CPT codes have an MUE. Subsequent to implementation, there have been quarterly updates increasing the number of edits.

The edits were developed based on anatomic considerations, HCPCS/CPT code descriptors, CPT instructions, CMS policies, nature of service/procedure, nature of analyte, nature of equipment, and clinical judgment. Prior to implementation, all edits were reviewed by national healthcare organizations, and their alternative recommendations were taken into consideration. In 2008, CMS has been refining the edits based on 100% submitted claims data from a six month period in 2006. Although CMS publishes most MUE values on its website, other MUE values are confidential and are for CMS and CMS Contractors' use only. The latter group of MUE values should not be released since CMS does not publish them.

UnitedHealthcare Medicare Advantage expanded the MUE program to include HCPCS “J” codes. The “J” code edits were developed based on HCPCS code descriptors, an unpublished CMS “J” code MUE list, a UnitedHealthcare Medicare Advantage published MUE list, historical claim data, condition dosage requirements and clinical judgment. CMS is publishing the unit thresholds for applicable “J” codes.

On April 1, 2013, CMS modified the MUE program so that some MUE values would be date of service edits rather than claim line edits. Therefore, at that time, CMS introduced a new data field to the MUE edit table termed “MUE adjudication indicator” or “MAI”.

**Reimbursement Guidelines**

MUEs for HCPCS codes with a MAI of “1” will continue to be adjudicated as a claim line edit. UnitedHealthcare Medicare Advantage adjudicates MUEs against each line of a claim rather than the entire claim. Thus, if a CPT/HCPCS code is reported on more than one line of the claim by using CPT modifiers, each line with that code is separately adjudicated against the MUE. If a provider bills units of service for HCPCS/CPT codes in excess of established limits, the edits prevent payment. UnitedHealthcare Medicare Advantage denies at the line level rather than the claim level for both Physician and Facility claims.

MUEs for HCPCS codes with a MAI of “2” will be an absolute date of service edit. These are “per day edits based on policy”. HCPCS codes with an MAI of “2” have been rigorously reviewed and vetted within CMS and obtain this MAI designation because unit of service (UOS) on the same date of service (DOS) in excess of the MUE value would be considered impossible because it was contrary to statute, regulation or subregulatory guidance. This subregulatory guidance includes clear correct coding policy that is binding on both providers and CMS claims processing contractors.

MUEs for HCPCS codes with an MAI of “3” are “per day edits based on clinical benchmarks”. MUEs assigned an MAI of “3” are based on criteria (e.g., nature of service, prescribing information) combined with data such that it would be possible but medically highly unlikely that higher values would represent correctly reported medically necessary services.

If the MUE is adjudicated as a DOS MUE (MAI 2 and/or 3), all UOS on each claim line for the same date of service for the same HCPCS/CPT code are summed, and the sum is compared to the MUE value. If the summed UOS exceed the MUE value, all lines for the HCPCS/CPT code and DOS for that current claim are denied.

Comments about MUE are received from the AMA and the national medical societies, representatives of the AMA’s CPT Editorial Panel, CPT Advisory, and Health Care Professionals Advisory (HCPAC) Committees, CMS Central and Regional Offices, Medicare Contractor Medical Directors, contractor staff, physicians, other providers, and independent billing consultants. Based upon input from these sources, an MUE may be deleted. MUE may also be deleted for other reasons such as CMS policies, modified HCPCS/CPT code descriptors or coding instructions, deletion of HCPCS/CPT codes, or modified medical practice. (Occasionally an MUE is modified. In such situations the original MUE is deleted, and a new MUE with the revised MUE value is added).
CPT/HCPCS codes identified in MUE Reference Lists below.

**MUE Reference Lists**

<table>
<thead>

</thead>
<tbody>
<tr>
<td>J Code MUE Listing Effective 4/1/2019 – 6/30/2019</td>
<td>This list has been calculated and assigned via internal review to stabilize excessive/inappropriate billing and regulate maximum unit allowance.</td>
</tr>
</tbody>
</table>

**Definitions**

**Modifier JW**
Modifier used to describe the amount of drug that was discarded and not administered to the patient. **Any** amount wasted must be clearly documented in the medical record, regardless of whether the JW modifier will be used in billing for the drug/biological, with:
- Date and Time
- Amount of Medication Wasted
- Reason for the Wastage

**MAI**
MUE Adjudication Indicator - The MUE files on the CMS National Correct Coding Initiative (NCCI) website display an "MUE Adjudication Indicator" (MAI) for each HCPCS/CPT code. An MAI of “1” indicates that the edit is a claim line MUE. An MAI of “2” or “3” indicates that the edit is a DOS MUE.

**MUE**
Medically Unlikely Edit – A unit of service (UOS) edit for Healthcare Common Procedure Coding System (HCPCS)/Current Procedural Terminology (CPT) code for services rendered by a single provider/supplier to a single beneficiary on the same date of service. The ideal MUE is the maximum UOS that would be reported for a HCPCS/CPT code on a vast majority of appropriately reported claims. The MUE program provides a method to report medically reasonable and necessary UOS in excess of an MUE. MUEs are not meant to establish Medicare payment policy, but rather to improve the accuracy of Medicare payments. Providers should not interpret MUE values as utilization guidelines. MUE values do not represent units of service that may be reported without concern about medical review. Providers should continue to report only services that are medically reasonable and necessary.

**Questions and Answers**

1. **Q:** Can providers bill fractions of units given?
   **A:** No, the dosing for drugs is always rounded up

2. **Q:** How do Providers calculate the units given?
   **A:** Example: J0207 Injection, amifostine, 500 mg – The Provider administers 350 mg and bills “1” unit. This is correct since the denominator cannot be broken down to < 500 mg and Providers are expected to round up since fractions are not accepted on the CMS 1500, 837P, UB-04 or 837I.
<table>
<thead>
<tr>
<th>Q</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q: What happens if a Provider bills for more than the patient received?</td>
<td>If the administration records validate the Provider billed more units than what the patient received AND there is no documentation of drug waste, the claim line will be denied again.</td>
</tr>
<tr>
<td>Q: What does the Provider need to do if he/she receives a complete denial of a “J” code?</td>
<td>The Provider may send in a reconsideration after he/she has validated the units on the claim are accurate. Medication administration records must accompany the reconsideration form.</td>
</tr>
<tr>
<td>Q: When does my claim get edited?</td>
<td>Claims are reviewed before they are paid (called prepayment review).</td>
</tr>
<tr>
<td>Q: What is the CMS MUE program?</td>
<td>The CMS MUE program was developed to reduce the paid claims error rate for Medicare claims. MUEs are designed to reduce errors due to clerical entries and incorrect coding based on anatomic considerations, HCPCS/CPT code descriptors, CPT coding instructions, established CMS policies, nature of a service/procedure, nature of an analyte, nature of equipment, and unlikely clinical treatment.</td>
</tr>
<tr>
<td>Q: How are claims adjudicated with MUEs?</td>
<td>UnitedHealthcare Medicare Advantage adjudicates MUEs against each line of a claim rather than the entire claim. Thus, if a HCPCS/CPT code is reported on more than one line of a claim by using CPT modifiers, each line with that code is separately adjudicated against the MUE. The entire claim line is denied if the units of service on the claim line exceed the MUE value.</td>
</tr>
<tr>
<td>Q: How do I report medically reasonable and necessary units of service in excess of an MUE?</td>
<td>The appropriate use of CPT modifiers to report the same code on separate lines of a claim will enable a provider/supplier to report medically reasonable and necessary units of service in excess of an MUE. CPT modifiers such as -76 (repeat procedure by same physician), -77 (repeat procedure by another physician), anatomic modifiers (e.g., RT, LT, F1, F2), -91 (repeat clinical diagnostic laboratory test), and -59 (distinct procedural service) will accomplish this purpose. Modifier -59 should be utilized only if no other modifier describes the service.</td>
</tr>
<tr>
<td>Q: How do I report medically reasonable and necessary units of service in excess of an MUE?</td>
<td>Since each line of a claim is adjudicated separately against the MUE of the code on that line, the appropriate use of CPT modifiers to report the same code on separate lines of a claim will enable a provider/supplier to report medically reasonable and necessary units of service in excess of an MUE. CPT modifiers such as -76 (repeat procedure by same physician), -77 (repeat procedure by another physician), anatomic modifiers (e.g., RT, LT, F1, F2), -91 (repeat clinical diagnostic laboratory test), and -59 (distinct procedural service) will accomplish this purpose. Modifier -59 should be utilized only if no other modifier describes the service.</td>
</tr>
<tr>
<td>Q: How are claim lines adjudicated against an MUE for a repetitive service reported on a single claim line?</td>
<td>If a provider reports repetitive services over a range of dates on a single line of a claim with multiple units of service, the provider should report the “from date” and “to date” on the claim line. UnitedHealthcare Medicare Advantage will divide the units of service reported on the claim line by the number of days in the date span and round to the nearest whole number. This number is compared to the MUE for the code on the claim line.</td>
</tr>
<tr>
<td>Q: What are MUE values for bilateral procedures (MPFS) Bilateral Indicator “1”?</td>
<td>The MUE limit set at “1” per CMS guidelines the provider should bill with modifier 50 on one line. If the provider bills the procedure on two separate lines with or without modifier RT/LT the MUE rule may apply. There are some procedures that are an exception to this. Please refer to the CMS NCCI Medically Unlikely Edits website.</td>
</tr>
<tr>
<td>Q: Can a practitioner use modifiers LT/RT with bilateral codes to exceed the MUE limits when services are performed in an Ambulatory Surgery Center, ASC (POS 24)?</td>
<td>Per the CMS Manual and NCCI rules the practitioner should use modifier 50 to allow the correct MUE limits for services performed in an Ambulatory Surgical Center. The Ambulatory Surgical Center facility is excluded from the bilateral modifier requirement and should be billed on two lines with an LT/RT modifier.</td>
