

## Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management Policy, Professional and Facility

**IMPORTANT NOTE ABOUT THIS REIMBURSEMENT POLICY**

*You are responsible for submission of accurate claims. This reimbursement policy is intended to ensure that you are reimbursed based on the code or codes that correctly describe the health care services provided. UnitedHealthcare Community Plan reimbursement policies uses Current Procedural Terminology (CPT®\*), Centers for Medicare and Medicaid Services (CMS) or other coding guidelines. References to CPT or other sources are for definitional purposes only and do not imply any right to reimbursement.*

*This reimbursement policy applies to all health care services billed on CMS 1500 forms and, when specified, to those billed on UB04 forms. Coding methodology, industry-standard reimbursement logic, regulatory requirements, benefits design, and other factors are considered in developing reimbursement policy.*

*This information is intended to serve only as a general reference resource regarding UnitedHealthcare Community Plan’s reimbursement policy for the services described and is not intended to address every aspect of a reimbursement situation. Accordingly, UnitedHealthcare Community Plan may use reasonable discretion in interpreting and applying this policy to health care services provided in a particular case. Further, the policy does not address all issues related to reimbursement for health care services provided to UnitedHealthcare Community Plan enrollees.*

**Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors include, but are not limited to: federal &/or state regulatory requirements, the physician or other provider contracts, the enrollee’s benefit coverage documents, and/or other reimbursement, medical or drug policies.**

*Finally, this policy may not be implemented exactly the same way on the different electronic claims processing systems used by UnitedHealthcare Community Plan due to programming or other constraints; however, UnitedHealthcare Community Plan strives to minimize these variations.*

*UnitedHealthcare Community Plan may modify this reimbursement policy at any time by publishing a new version of the policy on this Website. However, the information presented in this policy is accurate and current as of the date of publication.*

### Application

**This reimbursement policy applies to UnitedHealthcare Community Plan Medicaid.**

This reimbursement policy applies to services reported using the UB-04 Form, the 1500 Health Insurance Claim Form (a/k/a CMS-1500) or their electronic equivalents or their successor forms. This policy applies to all products, all network and non-network providers, including, but not limited to, non-network authorized and percent of charge contract hospitals, ambulatory surgical centers, physicians, and other qualified health care professionals.

### Policy

**Overview**

Therapeutic radiology clinical treatment planning (CPT Codes 77261, 77262, and 77263) is part of a series of services or procedures performed on a patient receiving radiation therapy. Clinical treatment planning is a separate and discrete step in the process of care that represents services that are unique and distinct from those provided within other planning codes. Within clinical treatment planning, the radiation oncologist develops the parameters of the therapeutic management plan, including the overall clinical, physical, and technical aspects of radiation treatment required for safe and effective therapy for each patient. This includes determining the treatment modality, total dose, fractionation and the need for planned field changes.

This policy addresses the reimbursable units for procedures and services performed within the 90-day episode of care and applicable reimbursement guidelines. During an episode of care, it may become necessary to perform additional

clinical treatment planning, due to changes in the patient's condition. A new 90-day episode of care starts each time a therapeutic radiology treatment planning code (77261, 77262, or 77263) is billed.

**Reimbursement Guidelines**

An episode of care begins when the first therapeutic radiology clinical treatment planning code (77261, 77262, or 77263) is billed and extends up to 90 days or when a new planning code is billed. Within the episode of care, UnitedHealthcare will consider reimbursement for the services, procedures, and units outlined below under the Treatment Management Codes section of the Applicable Codes. The reimbursable units per treatment planning episode are designed to capture all of the reimbursable work a provider does associated with these codes as part of treatment planning. Units billed in excess of the reimbursable units per treatment planning episode will not be considered for reimbursement.

Additional reimbursement policies may be applicable to these codes, including but not limited to: Intensity Modulated Radiation Therapy (IMRT), CCI (procedure- to-procedure) and Maximum Frequency Per Day (MFD).

**State Exceptions**

<b>Arizona</b>	Arizona is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Florida</b>	Florida is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Indiana</b>	Indiana is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Kansas</b>	Kansas is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Kentucky</b>	Kentucky is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Louisiana</b>	Louisiana is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Massachusetts</b>	Massachusetts is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Michigan</b>	Michigan is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Mississippi</b>	Mississippi is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Missouri</b>	Missouri Medicaid has a unit exception for code: <ul style="list-style-type: none"> <li>• 77300 allows 18 units</li> </ul>
<b>Nebraska</b>	Nebraska is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>New Jersey</b>	New Jersey is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>New Mexico</b>	New Mexico is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Ohio</b>	Ohio is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management

<b>Rhode Island</b>	Rhode Island is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Tennessee</b>	Tennessee is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Texas</b>	Texas is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Virginia</b>	Virginia is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management
<b>Washington DC</b>	Washington DC is exempt from Radiation Therapy Planning, Dosimetry, Simulation/Devices and Management

Definitions	
<b>Episode of Care</b>	An episode of care begins when the first therapeutic radiology clinical treatment planning code is billed and extends up to 90 days or when a new planning code is billed.

Questions and Answers	
<b>1</b>	<p><b>Q: How do I know when a new episode of care begins?</b></p> <p><b>A:</b> An episode of care begins when one of the therapeutic radiology treatment planning CPT ® codes (77261, 77262, 77263) is billed. Coding standards allow for only one of the planning codes per episode of care. Additional use of these treatment planning codes before a 90-day episode is completed would be due to changes in the patient's condition.</p>
<b>2</b>	<p><b>Q: Will modifiers influence the accumulation of reimbursable units?</b></p> <p><b>A:</b> Professional (26 modifier) and Technical (TC modifier) components, billed with the same code will be considered together when calculating the units allowed. Other modifiers may be appended but do not impact the accumulation of units.</p>
<b>3</b>	<p><b>Q: What happens if a provider bills over the unit limits?</b></p> <p><b>A:</b> If the provider bills more than the reimbursable units within a 90-day episode of care, the reimbursable units allowed would be considered for reimbursement. The units over the reimbursable units will be denied.</p>
