Unless a different amount is outlined in the State Maximums Section or the State Exceptions Section, a maximum of 300 individual units/items from the Group 1 supplies will be allowed per member per month. This equates to 9-10 disposable incontinent supply items per day or one every 2 ¼ - 2 ½ hours.

All Group 1 codes are monthly aggregates, regardless of a member requiring a change in size during the month. The maximum amount of each size per member per month is not allowed. Once the maximum unit/item count of Group 1 has been met, documentation showing medical necessity for exceeding the limit must be submitted before payment for any exceeding the maximum will be considered. Orders for all supplies must be submitted with the appropriate HCPSC code for the size provided.

If a member does not require incontinence supplies in Group 1, then no supplies in Group 2 will be reimbursable. If the member does require supplies from Group 1, then the Group 2 supplies will be allowed. **Unless a different amount is outlined in the State Maximums Section or the State Exceptions Section, a maximum of 300 individual units/items from the Group 2 supplies will be allowed per member per month.**

See above for a list of acceptable HCPSC Group 1 and Group 2 Supplies codes.

Vendors are not to schedule automatic shipment of incontinence supplies. Prior to each shipment, the vendor should contact the member or caregiver to determine the quantity of supplies on hand and the appropriate size and date for shipment. The delivery date should not be prior to the member having 15 days of supplies available. An order should not contain more than 30 days' worth of supplies. Delivering items where standard packaging exceeds 45 days or more supply is not permitted. Stockpiling of supplies is not allowed.

Questions and Answers	
1	Q: Why are incontinence supplies not reimbursed when only one diagnosis code is submitted?

	<p>A: A valid incontinence diagnosis and condition causing the incontinence must be listed on the claim along with any symptoms. A claim that list codes based on symptoms alone will not pay. Therefore, a diagnosis code causing the incontinence should be billed along with the symptom diagnosis code indicating the cause of the symptoms. So, it is not that the diagnosis is not covered, but that another code must be billed along with the diagnosis code for the symptoms that shows the condition causing the symptoms.</p>
2	<p>Q: Why are Group 2 supplies not reimbursed?</p> <p>A: Group 2 supplies are covered, but only if the member is also receiving Group 1 supplies. Group 2 products are used to maintain sanitary conditions for the member. The primary use is not to protect furniture and bedding. If the member does not require the use of the Group 1 products in order to maintain sanitary conditions, then there should be no need for the Group 2 products.</p>
