Overview

Observation care is defined as a well-defined set of specific, clinically appropriate services, which include ongoing short term treatment, assessment, and reassessment before a decision can be made regarding whether patients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital. Observation status is commonly assigned to patients who present to the emergency department and who then require treatment or monitoring before a decision is made concerning their admission or discharge.

Observation stay is an alternative to an inpatient admission that allows reasonable and necessary time to evaluate and render medically necessary services to a member whose diagnosis and treatment are not expected to exceed 24 hours but may extend to 48 hours, but no longer than 48 hours without a discharge or admission. There will be no reimbursement for observation services in excess of 48 hours
