Definitions

Nonoperative Therapy: Consists of an appropriate combination of medication (i.e., nonsteroidal anti-inflammatory drugs [NSAIDs], analgesics, etc.) in addition to physical therapy or other interventions based on the individual’s specific presentation, physical findings and imaging results (Ansok and Muh, 2018).

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may

require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.
