- Chromosome Microarray Testing (Non-Oncology Conditions) (for North Carolina Only)

Application

This Medical Policy only applies to the state of North Carolina.

Coverage Rationale

DNA-based noninvasive prenatal tests of fetal aneuploidy are proven and medically necessary as screening tools for the diagnosis of fetal abnormalities for high-risk singleton pregnancy. For medical necessity clinical coverage criteria refer to North Carolina Medicaid Clinical Coverage Policy No.: 1S-4, Genetic Testing.

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Coverage Determination Guidelines may apply.
