## Coverage Rationale

### Indications for Coverage

Wheelchair options and accessories are proven and medically necessary in certain circumstances. For medical necessity clinical coverage criteria, refer to the InterQual® Medicare: Durable Medical Equipment, Wheelchair Options/Accessories.

## ***Repair, Replacement, and Upgrade***

### **Replacement**

Replacement of DME is for the same or similar type of equipment which is beyond its reasonable useful life span and has become irreparable.

### **Upgrade**

The physician provides documentation that the condition of the member changes (e.g., impaired function necessitates an upgrade to an electric wheelchair from a manual one).

### **General Criteria**

- Routine wear on the equipment renders it non-functional and the member still requires the equipment.
  - Vendors/manufacturers are responsible for repairs, replacements, and maintenance for rented equipment and for purchased equipment covered by warranty
  - Coverage includes DME obtained in a physician's office, DME vendor, or any other provider authorized to provide/dispense DME
- Unless otherwise stated, DME has a Reasonable Useful Lifetime (RUL) of 5 years
- Pediatric equipment must allow room for growth with 2 inches in width and 3 inches of depth and width available for adjustments. Documentation of frame modifications or growth kits may be submitted to demonstrate growth allowances to the dimensions

#### Notes:

- Growth method for wheelchair may not mean ordering equipment that it is too large for current needs. This applies to new as well as replacement wheelchairs
- A new prescription isn't needed if the needs of the patient are the same.

### **Equipment Upgrades**

- A change in the member's medical condition and equipment needs requires the same documentation as a new request
- Equipment upgrades are equivalent to a new service

### **Coverage Limitations and Exclusions**

When more than one piece of DME can meet the member's functional needs, benefits are available only for the item that meets the minimum specifications for member needs. Examples include but are not limited to, standard electric wheelchair vs. custom wheelchair.

The following services are excluded from coverage:

- Personal care, comfort or convenience items.
- Batteries and battery chargers. Note: Batteries are covered when the supply is necessary for the effective use of the item/device.
- Replacement of items due to malicious damage, neglect or abuse.
- Replacement of lost or stolen items.
- Upgrade or replacement of DME when the existing equipment is still functional. Refer to the [Repair, Replacement, and Upgrade](#) section.

## **Definitions**

Check the definitions within the member benefit plan document that supersede the definitions below.

**Durable Medical Equipment (DME):** Medical Equipment that is all of the following:

- Ordered or provided by a Physician for outpatient use primarily in a home setting
- Used for medical purposes
- Not consumable or disposable except as needed for the effective use of covered DME
- Not of use to a person in the absence of a disease or disability

- Serves a medical purpose for the treatment of a Sickness or injury
- Primarily used within the home

**Medically Necessary:** Health Care Services that are all of the following as determined by us or our designee:

- In accordance with *Generally Accepted Standards of Medical Practice*
- Clinically appropriate, in terms of type, frequency, extent, service site and duration, and considered effective for your Sickness, Injury, Mental Illness, substance-related and addictive disorders, disease or its symptoms
- Not mainly for your convenience or that of your doctor or other health care provider
- Not more costly than an alternative drug, service(s), service site or supply that is at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of your Sickness, Injury, disease or symptoms

**Mobility Device:** A manual wheelchair, electric wheelchair, transfer chair or scooter.

**Reasonable Useful Lifetime:** RUL is the expected minimum lifespan for the item. It starts on the initial date of service and runs for the defined length of time. The default RUL for durable medical equipment is set at 5 years. RUL is also applied to other non-DME items such as orthoses and prostheses. RUL is not applied to supply items.

## Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.
