Coverage Rationale

See Benefit Considerations

Reconstructive Procedures

A procedure is considered reconstructive and medically necessary when all of the following criteria are met:

- There is documentation that the physical abnormality and/or physiological abnormality is causing a <u>Functional Impairment</u> that requires correction; and
- The proposed treatment is of proven efficacy and is deemed likely to significantly improve or restore the individual's physiological function.

Note: Microtia repair is considered reconstructive although no Functional Impairment may be documented.

Tissue Transfer (Flap) Repair

Flap repair is considered reconstructive and medically necessary in certain circumstances. For medical necessity clinical coverage criteria, refer to the InterQual CP: Procedures, Tissue Transfer (Flap).

Click here to view the InterQual® criteria.

Cosmetic Procedures

Cosmetic Procedures are procedures or services that change or improve appearance without significantly improving physiological function. A procedure is considered to be a Cosmetic Procedure when it does not meet the Reconstructive criteria in the Reconstructive Procedures section above.

Procedures that correct an anatomical Congenital Anomaly without improving or restoring physiologic function are considered cosmetic procedures. The fact that a covered person may suffer psychological consequences or socially avoidant behavior as a result of an Injury, Sickness or Congenital Anomaly does not classify surgery (or other procedures done to relieve such consequences or behavior) as a reconstructive procedure.

Note: Refer to the Benefit Considerations section for additional information on cosmetic services and exclusions.

Documentation Requirements

Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The documentation requirements outlined below are used to assess whether the member meets the clinical criteria for coverage but do not guarantee coverage of the service requested.

Definitions

The following definitions may not apply to all plans. Refer to the member specific benefit plan document for applicable definitions.

Cosmetic Surgery: Cosmetic Surgery is performed to reshape normal structures of the body in order to enhance an individual's appearance and self-esteem. (Freeman., 2023)

Functional or Physical Impairment: A Physical or Functional or Physiological Impairment causes deviation from the normal function of a tissue or organ. This results in a significantly limited, impaired, or delayed capacity to move, coordinate actions, or perform physical activities and is exhibited by difficulties in one or more of the following areas: physical and motor tasks; independent movement; performing basic life functions.

Microtia: Microtia is a birth defect of a baby's ear. Microtia happens when the external ear is small and not formed properly. The defect can vary from being barely noticeable to being a major problem with how the ear forms. Usually, Microtia affects how the baby's ear looks, but the parts of the ear inside the head are not affected. (CDC., 2023)

Reconstructive Surgery: Reconstructive Surgery is carried out on atypical structures of the body caused by congenital defects, developmental abnormalities, trauma, infection, tumors, or disease. Reconstructive Surgery is commonly performed to restore function but may also be performed to approximate a normal appearance. (Freeman., 2023)

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies may apply.

19316	Mastopexy
19325	Breast augmentation with implant
21137	Reduction forehead; contouring only
21138	Reduction forehead; contouring and application of prosthetic material or bone graft (includes obtaining autograft)
21139	Reduction forehead; contouring and setback of anterior frontal sinus wall
21172	Reconstruction superior-lateral orbital rim and lower forehead, advancement or alteration, with or without grafts (includes obtaining autografts)
21175	Reconstruction, bifrontal, superior-lateral orbital rims and lower forehead, advancement or alteration (e.g., plagiocephaly, trigonocephaly, brachycephaly), with or without grafts (includes obtaining autografts)
21179	Reconstruction, entire or majority of forehead and/or supraorbital rims; with grafts (allograft or prosthetic material)
21180	Reconstruction, entire or majority of forehead and/or supraorbital rims; with autograft (includes obtaining grafts)
21181	Reconstruction by contouring of benign tumor of cranial bones (e.g., fibrous dysplasia), extracranial
21182	Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tumor of cranial bone (e.g., fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting less than 40 sq cm
21183	Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tumor of cranial bone (e.g., fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting greater than 40 sq cm but less than 80 sq cm
21184	Reconstruction of orbital walls, rims, forehead, nasoethmoid complex following intra- and extracranial excision of benign tumor of cranial bone (e.g., fibrous dysplasia), with multiple autografts (includes obtaining grafts); total area of bone grafting greater than 80 sq cm
21208	Osteoplasty, facial bones; augmentation (autograft, allograft, or prosthetic implant)
21209	Osteoplasty, facial bones; reduction
21230	Graft; rib cartilage, autogenous, to face, chin, nose or ear (includes obtaining graft)
21235	Graft; ear cartilage, autogenous, to nose or ear (includes obtaining graft)

Description of Services

Reconstructive procedures treat a physical and/or physiological abnormality related to an injury, illness, development abnormality, or Congenital Anomaly to improve or restore physiologic function. Whereas cosmetic procedures are performed to change or improve appearance without improving physiological function. (ASPS, 2023)

Benefit Considerations

Some states require benefit coverage for services that UnitedHealthcare considers Cosmetic Procedures, such as repair of external congenital anomalies in the absence of a Functional Impairment. Refer to the member specific benefit plan document.

Cosmetic Procedures are excluded from coverage.

In most benefit plans the following cosmetic procedures are specifically excluded from coverage:

- Pharmacological regimens, nutritional procedures or treatments.
- Scar or tattoo removal or revision procedures (such as salabrasion, chemosurgery and other such skin abrasion procedures).
- Skin abrasion procedures performed as a treatment for acne.
- Liposuction or removal of fat deposits considered undesirable, including fat accumulation under the male breast and nipple. This exclusion does not apply to reconstructive liposuction.
- Treatment for skin wrinkles or any treatment to improve the appearance of the skin.
- Treatment for spider veins.
- Sclerotherapy treatment of veins.

Hair removal or replacement by any means, except for hair removal as part of genital reconstruction prescribed by a Physician for the treatment of gender dysphoria. (For laser or electrolysis hair removal in advance of genital reconstruction, refer to the Clinical Policy titled <u>Gender Dysphoria Treatment</u>)

Additional Information

- Benefits for reconstructive procedures include breast reconstruction following a mastectomy, and reconstruction of the
 non-affected breast to achieve symmetry. Other services required by the Women's Health and Cancer Rights Act of 1998,
 including breast prostheses and treatment of complications, are provided in the same manner and at the same level as
 those for any other Covered Health Care Service.
- If the original service was not a covered benefit under the contract or UnitedHealthcare guidelines, (e.g. cosmetic, investigational, not a covered health service, etc.), then benefits are limited to the treatment of the Complication. Examples include, but are not limited to:
 - Removal of a leaking or defective silicone breast prosthesis is a covered health care service. However, benefits for replacement of the breast prosthesis are only available if the original prosthesis was considered "reconstructive."

U.S. Food and Drug Administration (FDA)

This section is to be used for informational purposes only. FDA approval alone is not a basis for coverage.

Many cosmetic and reconstructive interventions are surgical procedures and are not subject to FDA approval. However, devices and instruments used during the procedures may require FDA approval.
