You must call 866-889-8054 to initiate retrospective reviews.

If the ordering care provider determines that a Cardiology Procedure is medically required on an urgent basis, and a prior authorization number cannot be requested because it is outside of UnitedHealthcare’s normal business hours, a prior authorization number must be requested retrospectively. Electrophysiology implants and diagnostic catheterizations must be requested within 15 calendar days after the date of service. Stress echocardiogram procedures must be requested within two business days after the date of service.

Documentation must include an explanation of why the procedure was required on an urgent basis and why prior authorization could not be requested during UnitedHealthcare’s normal business hours.
