UnitedHealthcare Pharmacy
Clinical Pharmacy Programs

Program Number	2018 P 2064-6
Program	Prior Authorization/Medical Necessity
Medication	Entresto (valsartan-sacubitril)
P&T Approval Date	8/2015, 1/2016, 2/2017, 9/2017, 2/2018
Effective Date	4/1/2018; Oxford Only: 4/1/2018

1. Background:

Entresto (valsartan-sacubitril) is indicated to reduce the risk of cardiovascular death and hospitalization for heart failure patients with chronic heart failure and reduced ejection fraction.

2. Coverage Criteria:

A. **Initial Therapy**

1. **Entresto** will be approved based on **one** of the following criteria:

a. As continuation of therapy initiated during an inpatient stay

-OR-

b. **Entresto** will be approved based on **all** of the following:

(1) Diagnosis of heart failure (with or without hypertension)

-AND-

(2) Ejection fraction is less than or equal to 40 percent

-AND-

(3) Heart failure is classified as one of the following:
(a) New York Heart Association Class II
(b) New York Heart Association Class III
(c) New York Heart Association Class IV

-AND-

(4) **One** of the following:

(a) Patient is on a stabilized dose and receiving concomitant therapy with one of the following beta-blockers:
i. bisoprolol
ii. carvedilol
iii. metoprolol

-OR-

(b) Patient has a contraindication or intolerance to beta-blocker therapy

-AND-

(5) Patient does not have a history of angioedema

-AND-

(6) Patient will discontinue any use of concomitant ACE Inhibitor or ARB before initiating treatment with Entresto. ACE inhibitors must be discontinued at least 36 hours prior to initiation of Entresto

-AND-

(7) Patient is not concomitantly on aliskiren therapy

-AND-

(8) Entresto is prescribed by, or in consultation with, a cardiologist

Authorization will be issued for 12 months

B. **Reauthorization**

1. **Entresto** will be approved based on **both of** the following criteria:

a. The Entresto dose has been titrated to a dose of 97 mg/103 mg twice daily, or to a maximum dose as tolerated by the patient

-AND-

b. Documentation of positive clinical response to therapy

Authorization will be issued for 12 months

3. Additional Clinical Rules:

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.
- Supply Limits may be in place.

Program	Prior Authorization/Medical Necessity - Entresto (valsartan-sacubitril)
Change Control	
8/2015	New program.
1/2016	Added in continuation of coverage after initiation from an inpatient stay. Changed EF criteria to ≤ 35% based on PARADIGM HF trial. Modified beta blocker language to state patient should be stabilized on beta blocker therapy. Included requirement of BNP levels based on PARADIGM HF trial and ACCF/AHA guidelines. Added prescriber requirement. For reauthorization criteria added a component that patient's dose has been titrated.
2/2017	Removed requirement that angioedema must be associated with an ACE inhibitor or ARB, based on the 2016 ACC/AHA/HFSA recommendation that Entresto should not be administered to patients with a history of angioedema. Updated references.
9/2017	Removed BNP requirement.
2/2018	Updated metoprolol to remove specification of metoprolol succinate. Revised ejection fraction from 35% to 40%.
12/2018	Administrative change to add statement regarding use of automated processes.
