Clinical Pharmacy Programs

Program Number	2024 P 2061-11
Program	Prior Authorization/Medical Necessity
Medication	Kalydeco® (ivacaftor)
P&T Approval Date	5/2015, 7/2016, 11/2016, 8/2017, 8/2018, 8/2019, 8/2020, 8/2021, 8/2022, 6/2023, 6/2024
Effective Date	9/1/2024

**1. Background:**

Kalydeco® (ivacaftor) is a cystic fibrosis transmembrane conductance regulator (CFTR) potentiator indicated for the treatment of cystic fibrosis (CF) in patients aged 1 months and older who have at least one mutation in the CFTR gene that is responsive to ivacaftor based on clinical and/or in vitro assay data.

If the patient’s genotype is unknown, an FDA-cleared CF mutation test should be used to detect the presence of a CFTR mutation followed by verification with bi-directional sequencing when recommended by the mutation test instructions for use.<sup>1</sup>

Members will be required to meet the coverage criteria below.

**2. Coverage Criteria<sup>a</sup>:**

**A. Initial Authorization**

1. **Kalydeco** will be approved based upon **all** of the following criteria:

a. Diagnosis of cystic fibrosis (CF)

**-AND-**

b. Submission of laboratory results confirming that patient has at least **one** of the following mutations in the CFTR gene that is responsive to Kalydeco:

711+3A→G *	F311del	I148T	R75Q	S589N
2789+5G→A *	F311L	I175V	R117C *	S737F

\* Clinical data exist for these mutations.

† Complex/compound mutations where a single allele of the CFTR gene has multiple mutations; these exist independent of the presence of mutations on the other allele.

**-AND-**

c. Prescribed by or in consultation with a provider who specializes in the treatment of CF

**Authorization will be issued for 12 months.**

**B. Reauthorization**

1. **Kalydeco** will be approved based on the following criterion:

a. Documentation of positive clinical response to Kalydeco therapy (e.g., improved lung function, stable lung function)

**Authorization will be issued for 12 months.**

<sup>a</sup> State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.

**3. Additional Clinical Rules:**

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class
- Supply limits may be in place.

Program	Prior Authorization/Medical Necessity - Kalydeco (ivacaftor)
<b>Change Control</b>	
5/2015	New Program
7/2016	Annual Review. Updated indication for those 2 years and older in background section. Updated reference.
11/2016	Revised prescriber criterion.
8/2017	Added 28 additional CFTR mutations based on labeling change.
8/2018	Annual review. No changes.
8/2019	Annual review. Updated background and references.
8/2020	Annual review with no changes to clinical coverage criteria.
8/2021	Annual review. Updated background to reflect approval of 4 months and older. Updated with most recent approved mutation table. Decreased re-authorization to 12 months. Updated reference.
8/2022	Annual review with no change to coverage criteria.
6/2023	Updated background to reflect approval for patients one month and older. Updated prescriber requirement, simplified reauthorization criteria, and updated reference.
6/2024	Annual review. Increased initial authorization approval duration to 12 months. Removed prescriber requirement from reauthorization criteria. Updated reference.
