Program Number	2021 P 2184-3
Program	Prior Authorization/Medical Necessity
Medication	Vumerity™ (diroximel fumarate)* *Vumerity is excluded from coverage for the majority of our benefits
P&T Approval Date	1/2020, 11/2020, 5/2021
Effective Date	8/1/2021; Oxford only: 8/1/2021

1. Background:

Vumerity™ (diroximel fumarate) is indicated for the treatment of relapsing forms of multiple sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.

Coverage will be provided for members who meet the following criteria.

2. Coverage Criteria^a:

<p>A. <u>Relapsing Forms of Multiple Sclerosis (MS) or Clinically Isolated Syndrome (CIS)</u></p> <p>1. <u>Authorization</u></p> <p>a. Vumerity will be approved based on all of the following criteria:</p> <p>(1) Diagnosis of clinically isolated syndrome (CIS) or a relapsing form of multiple sclerosis (MS) (e.g., relapsing-remitting MS, secondary progressive MS with relapses)</p> <p style="text-align: center;">-AND-</p> <p>(2) Prescribed by or in consultation with a specialist in the treatment of MS (e.g., neurologist)</p> <p style="text-align: center;">-AND-</p> <p>(3) Both of the following:</p> <p>(a) Submission of medical records documenting the trial and failure (after trial of at least 4 weeks), contraindication, or intolerance to at least two of the following:</p>

- Glatiramer acetate
- Avonex (interferon β -1a)
- Betaseron (interferon β -1b)
- Plegridy (peginterferon β -1a)
- Aubagio (teriflunomide)
- Mayzent (siponimod)
- Gilenya (fingolimod)
- Zeposia (ozanimod)
- Kesimpta (ofatumumab)

-AND-

(b) Submission of medical records documenting the trial and failure (after trial of at least 4 weeks), contraindication, or intolerance to **both** of the following:

- Bafiertam (monomethyl fumarate)
- dimethyl fumarate (generic Tecfidera) (trial must have started August 20, 2020 or later)

-AND-

(4) Patient is **not** receiving Vumerity in combination with another disease modifying therapy [e.g., interferon beta preparations, glatiramer acetate products, Tecfidera (dimethyl fumarate), Tysabri (natalizumab), Gilenya (fingolimod), Ocrevus (ocrelizumab), Lemtrada (alemtuzumab), Mavenclad (cladribine), Aubagio (teriflunomide), Bafiertam (monomethyl fumarate), Kesimpta (ofatumumab), Zeposia (ozanimod) or Mayzent (siponimod)]

Authorization will be issued for 12 months.

^a State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.

3. **Additional Clinical Rules:**

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.
- Exclusion: Vumerity is excluded from coverage for the majority of our benefits.
- Supply limits, notification, and/or Step Therapy may be in place.

Program	Prior Authorization/Medical Necessity – Vumerity™ (diroximel fumarate)
Change Control	
1/2020	New program
11/2020	Revised step therapy medications due to changes in preferred products. Removed continuation of therapy allowance and reauthorization section. Updated references.
5/2021	Updated step through both Bafiertam (monomethyl fumarate) and dimethyl fumarate (generic Tecfidera). Added requirement of medical record submission.
