

PATH Quick Reference Guide: Coding for Pediatric Health HEDIS® Measures

This guide is designed to be a quick reference tool to help with medical coding of select Healthcare Effectiveness Data and Information Set (HEDIS®) measures. Please use to address care opportunities for your patients who are UnitedHealthcare plan members. Please note, CPT®II codes are for reporting purposes only and are not separately reimbursable. If you receive a claim denial, your reporting code will still be included in the quality measure.

If you'd like additional information about these measures and more, please see the Reference Guide for Pediatric Health at UHCprovider.com/path.

Information contained in this guide is based on National Committee for Quality Assurance (NCQA) HEDIS technical specifications. For more details, please visit ncqa.org.
