Patient Episode Cost

Use this document with the UnitedHealth Premium® Program Methodology document at UnitedHealthPremium.UHC.com. Please review all of the methodology documents to understand the entire Premium methodology.

We evaluate physicians in the family medicine Premium specialty using the patient episode cost measurement with the condition-based episodes listed in the following chart.

Attribution methods determine which physicians and groups are responsible for care given to patients. Condition-based episodes are attributed using the cost method: the physician who was responsible for generating the highest percentage of services, based on normalized cost, in the episode. To make sure there was significant involvement, the attributed physician must be responsible for at least 50% of the total normalized cost of the episode.

Please view the Attribution Methods document to learn more.
