

EDI 278N for Admission Notification Can Help Improve Your Efficiency, Reduces Costs

Electronic Data Interchange (EDI) 278N is a system-to-system exchange of admission notification business data in standard X12 format between an inpatient facility and UnitedHealthcare. The EDI 278N can be transmitted to UnitedHealthcare directly, or through a clearinghouse, in either batch or real-time format.

The advantages of EDI 278N for physicians and hospital staff include:

- Fewer phone calls, faxes or manual data entry
- Increased data accuracy and reduced number of errors common with manual data entry
- Simplifying administrative tasks and increased productivity
- Receipt of service reference numbers to confirm that notifications are on file
- Reduced administrative costs
