Outpatient hospitals are required to obtain the medications listed in the [Medication Sourcing Protocol - Requirements to use a participating specialty pharmacy for certain medications document](#) from the indicated specialty pharmacies for distribution of these medications, unless otherwise authorized by us. When the specialty medication is obtained through the specialty pharmacy, the specialty pharmacy will bill us directly for these medications under the member's medical benefit. The facility administering the specialty medication is not to bill us for the medication obtained through the specialty pharmacy but may bill us for the administration of the medication to the member.
