At UnitedHealthcare, we’re doing all we can to simplify the health care system for everyone. That’s why we developed **Point of Care Assist™**, adding real-time patient information—including clinical, pharmacy, labs, prior authorization, eligibility and cost transparency—to existing electronic medical records (EMRs) to make it easier for physicians to understand what patients need at the point of care.

**Point of Care Assist** integrates patients’ UnitedHealthcare health data within the EMR to provide real-time insights of their care needs, aligned to their specific member benefits and costs. This makes it easier for providers to see potential gaps in care, select labs, estimate care costs and check prior authorization requirements—including benefit eligibility and coverage details. This helps them better serve their patients and achieve better results for their practice.
The more you know, the more effective you can be.

Get enhanced insights on patient needs and benefits, including information needed for lab selection.

Save time and money:
- Check cost information to help patients choose lower-cost care options and find UnitedHealth Premium® program providers known for quality, cost-effective care.
- Check prior authorization and referral requirements in real time and confirm eligibility.
- Get access to real-time, accurate information that helps reduce administrative burden and re-work.

Improve patient satisfaction and results:
- Increase cost transparency to improve patient satisfaction.
- Improve the quality of care, which may lead to higher Consumer Assessment of Healthcare Providers and Systems (CAHPS) scores and Medicare and Medicaid Star Ratings.
- Improve your ability to meet targets and earn incentives through the Medicare Advantage Primary Care Physician Incentive Program.

Together, we can make health care work better for everyone.
Trust UnitedHealthcare for accurate, real-time member insights. Information is available in real time, when you need it, 24/7.
