

New Mexico \$0 behavioral health coverage

Due to a New Mexico state mandate, certain medications used to treat behavioral health conditions may be covered at \$0 cost-share.

Select medications may require notification and review to determine \$0 coverage under the member's pharmacy benefit. This includes medications prescribed to treat a behavioral health condition that have not been approved by the United States Food and Drug Administration (FDA) to treat that condition. You may be required to provide additional information, including the behavioral health condition being treated, to UnitedHealthcare to determine if the medication qualifies for \$0 coverage under the member's pharmacy benefit.

Please contact the OptumRx Prior Authorization department at **1-800-711-4555** or <https://professionals.optumrx.com/prior-authorization.html> to request a prior authorization if you believe your member's prescribed treatment qualifies for \$0 cost-share coverage.
