Clinical Pharmacy Programs

Program Number	2020 P 3015-10
Program	Step Therapy – Glaucoma Agents
Medication	Vyzulta (latanoprostene)*, Zioptan (tafluprost)
P&T Approval Date	7/2013, 8/2013, 2/2014, 2/2015, 3/2016, 3/2017, 3/2018, 3/2019, 3/2020
Effective Date	6/1/2020; Oxford only: 6/1/2020

1. Background:

Lumigan (bimatoprost), Travatan Z (travoprost), Xalatan (latanoprost), Vyzulta (latanoprostene) and Zioptan (tafluprost) are ophthalmic agents indicated for reducing elevated intraocular pressure in patients with open-angle glaucoma or ocular hypertension.

Step Therapy programs are utilized to encourage the use of lower cost alternatives for certain therapeutic classes. This program requires a member to try latanoprost (generic Xalatan) before providing coverage for Vyzulta or Zioptan.

If a member has a prescription for latanoprost in the claims history within the previous 12 months, the claim for Vyzulta or Zioptan will automatically process. Members, who have received at least a 90 day supply of Vyzulta* or Zioptan in the past 120 days as documented in claims history, will be allowed continued coverage of their current therapy.

2. Coverage Criteria^a:

A. Vyzulta* or Zioptan will be approved based on the following criterion:

1. History of failure, contraindication or intolerance to latanoprost (generic Xalatan)

Authorization will be issued for 12 months.

^a State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.

*** Vyzulta is typically excluded from coverage.**

3. Additional Clinical Rules:

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.
- Supply limits may be in place.
