

Where to find tools on the UnitedHealthcare Provider Portal

Quick reference guide

Over the next few months, all self-service tools will be officially retiring from the legacy Link online self-service experience. As we continue to upgrade our digital services, we have introduced a better system to work with us — the UnitedHealthcare Provider Portal. With the portal, you'll be able to find everything you need and customize various features right in the dashboard. Here's a list of tools that are currently available in the portal and where to find them, as well as a look at when other tools will be available.
